

Setupuram

The valuation
of each lot has been
made - It is
known it will
be sold at
890 £ - 2
and half
shillings -
The value of some
lots is as low as
one shilling -
and some are as high as
£100 -

Solutes from the stratum de-
p. de Brachygnathus

Sheet 36. 13.

A close-up photograph of a piece of aged, yellowed paper. The paper has a vertical crease down the center and some brown staining or foxing, particularly on the left side. The texture appears slightly rough and fibrous.

199-8 at 3 1/2 p.m.

Regist. No. 117

Sheet No 2

2
No 117

II. Wet lands depend upon one large Tank - It is fed by the river Kumbha - one of the influential rivers in the Village. The Tank is round -
The Mahajanams say that Wet & Dry lands are as waste or not of any long standing - They are "Mattiuk Kad" or the Lands full water ^{at all} once in 20 yrs.
It is true that in the fork of the country some of the Lands are not fit to be cultivated annually. They require some rest to regain their fertility. I am satisfied that
there is no waste to such an extent as stated in that account of the Mahajanams - On the whole all the Lands are fit to be cultivated. One half of the Dry
Lands raised as waste may be safely said as Waste. The rest are cultivated annually if the season be favourable - Wet Lands are cultivated & have generally 6 crops
the area of Wet. Soil is of a superior quality generally. Some are Cotton, some are Rice, & some are Vandel or alluvium - As usual D. Villegas complains
that the floods of the river injure some of the Lands occasionally - Timber is raised in the Village ^{with} in 20 yrs. Cotton is cultivated in Dry Lands - ^{complain}
The Mahajanams assure me that no Pungah or lands are converted into Mangals though I doubted that some of the Dry Lands may have been
^{at all} converted into Wet. On the whole the Village is in prosperous state - With all these advantages the profits of the Mahajanams as far as their
own statement are 363 Rs. Of this Rs. 200 of the 1888 Manamunial Charges 30 Rs. making in total 130 Rs. is deducted, the net profits are
225 Rs. per annum This is very low. The average rates of Gold as well as of ordinary Lands are ^{very} high - On the other hand Rental profits as per statement of the
Mahajanams are very low. With reference to the forests of civil &c. after entering into much details, I frame the valuation as follows with the aid of
Mahajanams & those of the neighbouring Villages - guarding at the same time for myself without arriving at the very conclusion.
