

Regester No. 266
Sheet No. 1

II... The present area of the Village corresponds to that given in the account of 1712. No boundary farther. The Germanian Father painted it correctly - Hence the town area of 800 acres is confirmed here.

III. Wet lands depend upon a small tank. They are not cultivated since the last 25 years from the soil being impregnated with the salt. The tank also is not in repair 10 acres of Dry lands are cultivated since the last 10 years. Soil is of an inferior quality. The average profit of the Village are 5201 as per statement of the Farmers. The loss is paid from the Revenue of the other Panchayat villages. I give the valuation as follows with reference to the fertility of soil & the land charges as they are of a very waste.
