

தெய்வநாடு

(This is one of the Damoanams in former times of Ramnath - It is said that this was granted by the Zamindarth of Lovandera Pindya - some years ago
to one Ananta Kristianjan with 9 1/2% the Village on one & the same date - Now 9 2 1/2% Village from now Peringamalai Talukam or District
- This is a hereditary grant. This is in uninterupted possession of its holders since the date of the grant - There has been no better engraving on a stone in Alagerty for it
- in Melur Taluk - No Talk over about the area or about the townaries on the part of Ramji's Vaddal - Since the area of 160 Acres & 50 fanis is
confirmed here - The usage is labor forage - This Village consists of no Porogors or Vaddals - The lands are enjoyed as shown in the margin.
The lands are divided permanently - Ponpu is paid on the extent of lands held by several chachars Pass -
as per the Original Grantee & put on as several generations passed between themselves & the
where maps are on

II The persons #1 to #11 say that they are the descendants of the Original Grantee, they are unable to describe the relationship existing between themselves and the person entitled to the land in 1815 or about that time. These individuals are the principal shareholders of the some of the 92 3/4 Villages forming the Pungarawai - Village in 1815 or about that time. Hence I recommend to confirm the Village on - Holman. It appears by the location that the persons #1 to #11 are descendants of the Original Grantee. Hence I recommend to confirm the Village on - Holman. As there are no direct proof to show that the persons #1 to #11 are descendants of the Original Grantee, I recommend to confirm the Village on - Holman. The persons are undoubtedly descended from the Original Grantee.

These prices are

1. Salug depends upon one Tank of moderate size. It is in repair. It is fed by Puzh's Stream.
 The Tank is filled annually. Security of Water is felt in some years. The Perungarannal Salug Vattam
 in which the Village is situated is noted for best Drylands. I inspected myself the lands of the Vattam -
 Dry lands may be said to be good. The soil is very black. The Dry & Wet lands are planted as usual
 - are "Mittakad". There are no long uncultivated lands. Wet lands are not cultivated for long time.
 Puzh's lands are of a medium character. Wet lands also are of the same description.
 I have no means to enter here the average assessment of the adjacent open lands - The zamindars
 - Sirdar reported that he has no detailed accounts. The average assessment of the Tank in which the
 Village is situated is given in the margin. The Dry rates of assessment vary from 1-4 to 5-11-10 per
 - The average income of the Village as per statement of the Subgannam is 31-32 per annum.
 - This is not true - In consideration of the fertility of soil &c, I found the valuation of the Village
 - as follows.

Wet 6 Acre of Salug annually at 30 per Acre 1800
 Wet 8 1/2 Acre of Salug at 20 per Acre 1700 3500
 Dry 50 Acre of Salug at 12 per Acre 6000 3700
 Dry 87 Acre of Salug at 6 per Acre 5220 3200
 Total 10520
