Valuation

III Wet lands depend upon one Tank of moderate size. It is in partial repair. It is fed by Pungle Stream - ^{not full stocked with Dry crops}

The Mahajanams say that $2\frac{3}{4}$ Ann of Wet land as waste are of long unencultivated lands & that they are ~~not full stocked with Dry crops~~

It is further said that 60 Ann of Dry land as waste are not full stocked with Dry grain - The Mahajanams are not to blame -

I cannot believe that such a large extent as $2\frac{3}{4}$ Ann of Wet land are full stocked with Dry grain - The Mahajanams are not to blame -

Wet lands full stocked with Dry grain as waste. But it is true that the $2\frac{3}{4}$ Ann of Dry land composing the Perungaranni Taluk are not in

generally in such a state as they ought to be from the fertility of lands. This is attributable to the negligence of the Mahajanams &

to their quarrelsome conduct. There is no unanimity in them. No one likes to restore or repair Tanks - but to plunder the produce

with the Perungaranni grain. The conduct of these people are known both in this District -

Wet lands are not full stocked 20 times - Wet & Dry soil is of a superior quality generally - If the Tank is improved no

scarcity of Water is felt. Even now scarcity of Water is not felt for Wet lands full stocked usually -

The average income of the Village as per statement of the Mahajanams is 70 Papes. This is not true -

I have no materials to enter here the average assessment of the adjoining Wet lands as the Pung's servants were furnished with the

detached accounts - Pung's adjoining is too many for my ^{to come to one Paper} paper -

In consideration of the fertility of soil & the value of the Village as follows -

at 2 1/2 papes per ann. 105

- Wet 30 Acres full water usually at $3\frac{1}{2}$ ¢ per acre. - 105
 - Wet 18 Acres full water on the dry crops ~~at~~ occasionally } 18
 - at 10¢ per acre
 Total --- 123

-Dy 60. Area full water annually at 1st of June an — 60 —
13-11-

-Dy 56³/₄ New Waste, Mottukad En at 1/2 puzam 13-11
