Tulu Kani Kuchi

50 to 57 57.2

1 This is one of the Darnas in the Revenue of Ramnath Zamindari. This was granted by Sanga Sanga to the patta 13 & others for subsistence with 91 3/4 Villages one of the same date. This is a hereditary grant. Patta is engraved on a stone in Sanga Sanga. The village is in enjoyment. No dispute regarding the boundaries nor about the ~~land~~ area on the part of the Range. The boundaries correspond to those in the Account of 1724. The area of 177 acres & 69 futs is confirmed here. The village consists of 100 houses. The houses are enjoyed & Sanga Sanga is paid as ~~rent~~ shown in the margin. The person of 16 an descendant of the 1st Grantee as appears by the tradition & by the Mahajanams of the adjacent Villages. But as general generations passed, the person of 16 are unable to describe their relationship with the patta of 13. The houses are divided permanently. The patta of 16 are the holdings of the several individuals were measured once long ago. The persons whose names are entered of 15 were not the shareholders in the Village. They were shareholders of some of the Villages forming "Perungaranai Pattanas" (Three must add).

Use preceding rate

II Wet lands depend upon one tank of moderate size - It is in repair partially - It is fed by -

Jungle Stream - The tank is filled annually - Security of water is not much felt -

The pump 16 say that 5 Ann & 80 paise of wet & 100 Ann & Dry plowed as waste are cultivated - or the lands fallow once in 2 or 3 years - There is some exaggeration in this, as it appears from the individual verbal statements of the people - Wet lands are not cultivated 2 times - No. 1 is raised

Wet & Dry soil is of a mixed kind of character generally - I have no materials to enter here the average assessment of the adjacent Ayer Village - The average wet & Dry assessment of the Taluq is given in the annexed table -

The Dry assessment of the contiguous Ayer Village does not exceed 12 Ann per acre - The average income of the Village as per statement of the Mahaswami is 35 Ann per annum - This is quite false - In consideration of the fertility of soil & I frame the valuation of the Village as follows -

- Wet - 12 Ann cultivated annually at 3 1/2 Ann per acre - 42 Ann
- Wet - 3 Ann cultivated annually at 20 Ann per acre - 60 Ann
- Dry - 70 Ann cultivated annually at 3/4 Ann per acre - 52 Ann
- Dry 83 1/2 Ann 3 cultivated annually at 6 Ann per acre - 31 Ann
