XVI --- Wet lands in this Village depend upon two Tanks of large size. They are in repair - They are fed by Temple
 of much in fallow. They are fed annually in full. Fertility of Water is not felt generally. The Mahajanams say that there is no easy
 in the Wet area. They claimed all the Wet lands as being cultivated annually. Dry cultivation is very extensive in this part of the
 Geminany of Raminad. The Mahajanams claimed 1764 Ams of land as full tilled lands & 720 Ams as waste. There is very
 heavy. They said voluntarily that they 720 Ams of waste are not being uncultivated lands & that what is left all of
 being full tilled annually as Mattukad or in other words a few Ams are full tilled this year; they are left waste in nearly
 & they are full tilled again in the 3 years. I don't conceive that there will be such an extensive Mattukad lands.
 appears the result of my enquiry go to prove that there is some exaggeration in the matter. Wet lands are not full tilled
 as it is generally the case in Raminad Geminany. No portion of Dry lands are said to be full tilled but converted into Wet at any future
 period. Mangal lands are of a medium quality generally. Puzhal lands are of a superior quality generally. They consist of
 Rayer, Red flags. The village is an important one. It is in flower bearing state. No garden crops are raised in this Village.
 The average income of this Village is 1649 Rupees per annum as per statement of the Mahajanams. I have no materials to enter here
 the average Wet amount of the contiguous Agan Village of Porolagudi as the Mahajanams failed to produce the detailed Accounts
 the same. The Salary was a portion of Pallimadam Salary & it was transferred to Raminad Salary a few years ago
 with a view to make the Salary of Pallimadam pure Agan. The average Wet amount of the Salary is 9 8 - per Ams
 while the Dry rates vary from 2 1/4 to 5 1/4 per Ams. The Wet rate is of no use as it is very high as it is the average
 an entire Salary. The Dry Madamam rate too is very high. The highest is charged for a few Agan lands. The Dry rate of Raminad
 Salary in which the Damamam is situated does not exceed 1 1/2 Rupees per Ams. The cause of variation of the fertility of the
 I frame the valuation of the village as follows - in consultation with the Mahajanams.

This is one of the Choultry Villages in the Taluq of Rajasingamangalam. 3/4 of the Village was granted for the support of the Choultry of Mutturamalinga Patnam in the village of Mutturamalinga Patnam. For Register of the Village of Mutturamalinga Patnam - for details of the Choultry - the remaining 1/4 of the Village was granted for the maintenance of Mutturamalinga Patnam in Sivipattanam. The Institution is apparently a Choultry. Several men are paid there daily. In the Account of 1811, the entire Village is entered as an endowment of Mutturamalinga Patnam. This is a mistake. In the Tamil Account of 1815, 3/4 of the Village is entered in the name of Mutturamalinga Patnam & 1/4 in the name of Mutturamalinga Patnam. It is proved by the Choultry that the entry in the Account of 1815 is correct. It is also proved by the Trustees of the Choultry, that the proceeds of the 1/4 Village are being appropriated to the use of the Mutturamalinga Patnam & the 3/4 Village are being appropriated to the use of Mutturamalinga Patnam.
