

Register No. 66

Sheet No 74

II. The area of the Village exceeds ~~that~~ given in the account of 1721 by 9 acres. The account of 1721 does not include some of the inarable lands. Hence the difference. The pargana produced an account of 1788 showing that the Village was measured by the New Dewan Moot's Delapated Pargana. This account shows that the area of the Village is 67 1/2 acres. The pargana's Talukdars find no fault with the boundaries. which correspond to those in the account of 1724 &c. Hence the 67 1/2 acres are confirmed here. The Village has no Hamlet nor Hamlets.

III. . . There are no Wet lands in this Village. but Pungah. Out of Pungah not above 30 Acres are cultivated in aruggan - The rest
in the land fit for cultivation if they are freed from present calamities & repaired of all respects & being sown under plough - The soil is good
Two large sufficing channels run through this Village - Its garden crops are raised in this Village - The average measure is at 6-3-2 per annum
as per statement of the peshwa 1786. There is not true salt to its full extent - The average of the salt & its measure is 149 grains
