Salutation

11- Wet lands depend upon a large Tank - It is very rare since the Village
 was purchased by the present holder of the Village - The Tank is fed by the
 water of the large Tank of the Upper Village of Telum and Thrai & by the
 running stream of a singular - That large Tank is fed by the river Tundun
 The Tank is usually of the Village river settlement is annually filled in full
 The person of 16 says that the soil of Dry lands classed as waste are 10 or 15 years
 from want of proper care on the part of the holder - Because says that the soil
 Waste lands are not tilled & that the soil waste are not so tilled as cultivated
 but fallow occasionally - The result of my careful and enquiry into the soil
 & into the inhabitants of the neighbouring Villages about the ~~land~~ ^{soil} is
 - half of the lands classed as waste by the H of 16 are waste & that the other
 - are in fact to be cultivated of the H of 16 better care of the Village - The
 being a cultivator himself, he will be improve the Village as
 improve it naturally. Well known cultivator 2d June 175 or 1/4 of the
 The person of 16 says that about 14 years have been cultivated this year
 - Wet & Dry lands are of a number of persons generally 15 persons not 20
 I have no materials to be here the average rate of soil around
 Hyderabad - The average Dry rates of the neighbouring Villages are at 160
 But the soil of the Village is not equal but imperfectly & there are
 Waste lands - Average profits of the Village are 740 per annum
 H of 16 which is false - I gave the valuation as follows with the end
 after weighing the fertility of soil &c
 1002 per acre 3 1/2 of per person 80-8

Oct 23 actual $3\frac{1}{2}$ years per 808
 Oct 66 $\frac{1}{2}$ actual 2022 133

 213-8-0

Note I have changed my land with the lower
rate of assessment as the lands are
not fertile as they are - Coulton town
Walsley, Hattle Wood & Aggar. The assessment
is 2 in the ordinary of the land is
