

The present area of the village corresponds to that given in the account of F.H.E. The present holder says that the village was measured some 60 or 70 years ago & the area found to be correct - The purnambo lands no fault with the bounding of the village - The portion of the Darmasaraman = portion of the village consists the "Nangal" or boundaries of the village & not half village - Hence the area is confirmed as on the Darmasaraman & Purnambo lands belong half to the Darmasaraman & the other half to the Devadayan - Their Purnambo lands are not divided while the arable lands have been divided equally. The tank, channels & belong both to the Darmasaraman & the Devadayan - The lands in the village are not liable to exchange - The Darmasaraman half village consisting equal shares - Even Post 9 shows are not liable to exchange - The lands in the village are not liable to exchange - The Darmasaraman half village consisting equal shares - Even Post 9 shows are not liable to exchange - The lands in the village are not liable to exchange - The Darmasaraman half village consisting equal shares - Even Post 9 shows are not liable to exchange -

III. The Temple is especially kept - Daily ceremony.
 Five fairs held annually twice or often - ~~in~~ for festivals are held
 = year - The Temple is a noted one.

IV. The best lands in the whole Village depend upon one small Tank - Out of 24
 lands 9 are cultivated annually & the rest occasionally - Paddy lands are of immense
 waste from their infertility such as saline &c. they may be brought under plough at some
 future period - The next profits of the Devasthanam are 8 Aspers.

F. The Damisamam portion of the Village - Out of 12 lands 12 remain for them
annually & the rest is left waste since the last 30 years - The Mahajanams state that
they will be cultivated if the land is improved - Properly speaking such lands are
not lands must be entered under the head of Pongah. I will however charge the waste with the
rate if the lands had been surveyed, such a sale or transfers from dry state & vice
would be inadmissible. Pongah lands are of long waste they are used for pasturage of cattle
some extent.

some extent.

IV. The figures given in the Census of 50 of the Papuli are derived from the returns of Registers produced by the present holders of the Village. The last census was of a medium character. No scarcity of water is felt in the Village for the land usually under plough.

III The Hindoo of the Pagoda says that the carriage net
is paper minus Pongu or Loh.

VII. The Mahazaranis say that their overage will profit as

I have given the average rates of the Dutch
 These averages ~~are~~ are prepared carefully at
 average rates &c, the former don't seem to be any too. But I don't believe
 Dairies are as numerous as I have supposed. The lands of
 within 10 miles of the coast are generally flat & low & are subject to the
 suffer from security & hence the emigration from it is the largest. In consequence
 of these circumstances, I frame the valuation as follows in detail - to have an
 average of the same.

To come
