

Kenkatamurichi

I visited one of the villages in the paminang of Ranao apurum - This was granted by ~~the~~ one of the ancestors of the Rany of Napamoo, for the support of
the Temple of the Raman or the Poring as it is seen from the accounts of July 1811 & of AD 1815. The object of the grant is to worship all the Gods in the
Temple & to perform certain festivals for the Gods of Ranao or the Poring. The object of the grant is sufficiently kept up & the temple is in repair.
The Tabernacle of the temple in producing several statements, registered in this office deducted the undermentioned lands as Durmasagami
- portions of the Kibogunom 7016.

The Valuation of the Trustees of the Delawareanum. The Delawareanum from its self should be considered to consist of four equal Valuations. The first Valuation as shown in the first sheet.

Valuation

1 Wet lands depend upon one of four to small tracts - They are in repair - They are fed by one of the branches of the Delaware River, and are not in repair in the District - The Tracts are filled annually in ordinary seasons - The Delawareanum portion of Dry & Wet lands are full of water annually in full or as much as the Delawareanum portion. Very few lands are full of water annually 2 times - The Delawareanum says that 4 or 5 acres of land have been full of water 2 times in the year - The Dry & Wet lands are of a medium fertility - The District has some superior & inferior lands - Scarcity of Water is felt rarely - The Village is in good order - There is no material to enter here the average amount of the adjacent Delawareanum - The Wet & Dry lands produce good harvest - Average Dry rate of the contiguous Delawareanum Village of Vandy is about 102 years per annum - In consideration of the value of the Delawareanum as follows with the aid of the Delawareanum -

Set 32 Acres at 3 1/2 per acre	112
May 53 Acres at 9 per acre	474
Total	586
