1 This is one of the Darmaconoms in the zamindari of Ramnagar. It was granted by the Pundya King in 1115 to the person of 13 for subsistence. It is a hereditary grant. It is in uninterrupted possession of its holders since the date of the grant. It has no Patta. The Village is supported by the accounts of 12. The Cows have been divided permanently. No exchange takes place periodically. No talk even about the area, or about the boundaries on the part of Ramnagar. Hence the area of 504 $\frac{1}{2}$  acres is confirmed here. The Cows are enjoyed as shown in the margin without further. Profits paid on the extent of lands in possession of the persons of 10 & 11 respectively. The Village was measured previous to the permanent settlement. In July 1258 the Cows have been divided as shown in the margin on approximation, not on actual measurement. No person of 16 came thence, one descendant of the Original Grantee. But as this is a very ancient grant they are unable to describe the relationship existing between themselves & the person of 13. The persons of 10 & 11 were not the holders of the Village. They were the holders of 90% Village forming the Pannu of Pannagarany, who it was granted on once & the same date to the person of 13. The person or any of the Village forming the Pannu of Pannagarany Pannu it is in the Board's account of 1815. There are omissions by some mistakes. It is not in fact a perfect account. (See next case)

upon Village of Mandan & the Ponsaga River - at 10 per acre - The average profits of the Village are  
 511 - General fair - The statement A given on the back of the paper will show the nature of the soil & the nature of the soil  
 in the settlement of the Ponsaga River - After weighing the details of the soil & the nature of the soil  
 the Dry Land is not equal in fertility to that of the adjacent Ponsaga River  
 (Wet Cultivation) 25 Acres at 3/4 of an acre 878  
 (Wet Occasional Water) 19 Acres at 20 20 38  
 Total 125-8-0

Dry 252 (Cultivated) 6 Acres - per acre - 96 126  
 Dry 100 (Wet Cultivation) 1/4 of an acre - 25  
 Dry 100 (Wet) at 2 1/2 per acre 128  
 Total 163-8-0  
 289-2-0  
 257-8-0

Ramona

 J. L. Woodhouse

The Dr. C. W. has explained why a  
 valuation has been adopted for dry land  
 (cultivated) when the minimum rate  
 in the Dakota is 11 Acres & the average  
 rate in the adjacent Ponsaga villages is 8  
 Acres. It is also required to be  
 explained that "Ayer" means  
 whether General in Ponsaga  
 Government Lands - 10/9/63 W. B.

- Though the minimum  
 - Dry rate of assessment of the Village  
 - in which the Village is situated  
 - is at 5 1/2 10 per acre, at all it is  
 not suited to the circumstances of the  
 Village under settlement as  
 is announced by the Village of another  
 Village the Dry rate of which is  
 at 8 1/2 per acre - I must adopt  
 the said rate of 8 1/2 per acre -  
 This I reserve the valuation of Dry Land -  
 The term "Ayer" means, the  
 General in Ponsaga Lands or the Lands  
 situated within the limits of the General  
 to the entire settlement of which the  
 General has right -
