N. L. - are left waste from wood & paper. Average profits of the Crest - 9 1/2 - 43
 - Things as per statement of the Mohoguanum are 11 1/2 of Opres - Pungia
 - after 1/2 of the 2000 goss 8000 is deducted the net profits Huskiam 51 - 27
 - are 58 per annum. These calculated not on real profits 16
 - but as as to leave the net profits as to bring 20 at 20 on Nesle 46 - 35
 - the army of Opres - I have no materials to enter benefit the average
 of Opres as the net profits of Opres from the average of Opres

1 This is one of the Barmasac areas in the peninsular of Ramasapam. This was granted by the Government of 1811 to the person of 1813 for subsistence - This is a hereditary grant. This is in uninterrupted possession of its holders since the date of the grant. The Volume of the person of 1813 states the present holder - was lost & that they have copy of the same - I cannot say that this copy is a genuine one in the absence of the Original Path - However the Village is supported by - by the accounts of 1812 - The Village consists of 20 equal families - They are engaged as shown in the margin - Lands are divided - Lands are exchanged once in - 30 years - The Village is enumerated in the Board's Register of 1815 - The present area exceeds that given in the account of July 1211 by - 28 acres. All these lands are situated within the proper limits of the Village. No talk now about the transmission the part of Rong's Volume hence the - area of 144 acres is confirmed here -

Valuation

I Wet lands depend upon one large tank & two small ponds - Pay one fee
 - by the tank of the open village of Ponnaiyandam. The lands are owned & the supplying
 - channel is an independent one ~~the~~ - has no outlet. This is very valuable village.
 This much to be taken with the Mahayanas. Pay 59 Rallam for the
 bed of the tank & on my inquiry to the ~~the~~ that out of the 59 paly
 Rallam are for ~~the~~ of water fullness, but by mistake they have
 them as Ponnaiyandam & that they should be placed now as fullness lands.
 Then I transposed 40 Rallam to the head of fullness. Still I doubt
 whether the Mahayanas placed fullness lands as Ponnaiyandam.
 The Mahayanas say that the ~~the~~ & Dry lands of ~~the~~ are waste are ~~the~~
 on the lands fullness once in two or 3 years after giving them fertility -
 - This is also not true. ~~the~~ in the village. Wet lands
 - are fullness 2 times 1/2 of the bed area occasionally - Soil is of a -
 - ~~the~~ generally. Soil is mixed in 2 or 3 acres. Land fertility of water
 - is felt occasionally. The village is ~~the~~ - Average rate of good
 - as well as the ~~the~~ in which the ~~the~~ is situated are given ~~the~~
 - on the bank of the tank sheet. Recently in the village lands were sold at 1200 per acre in Ponnaiyandam
 - ~~the~~ are sold at the same time. Harvest is good generally. Average price of the village as per ~~the~~ of the Mahayanas
 - ~~the~~ of the ~~the~~ of Ponnaiyandam & ~~the~~ of Ponnaiyandam are ~~the~~ of Ponnaiyandam
 - ~~the~~ - The statement will show that the are produced at 5 1/2 Rallam of grain during the last 15 years & that grain was sold
 - at 250 per Rallam during the said period. After entering into much detail about the fertility of soil & I frame the valuation of the village
 - as shown below with the aid & concurrence of the Mahayanas. Most of the lands in the village are Ponnaiyandam & ~~the~~ - The results shown in detail & are
 very high -
