The wet lands depend upon a Lake of moderate size - & are generally - Wet lands are not full water & there-
by lands passed as waste. are situated - Soil is of a medium character generally - The adjacent byer villages but are
scarcely watered & felt occasionally No materials to show the average rate of assessment of the byer village & refer
settled on sharing system - The adjacent byer village is Lohar. The average rate of byer assessment of the byer village & refer
Shruti gadi or lands = here - Average profits of the village are 65 per cent of the total amount - This is not fair.
Savon 23-8-11 Report of Ananta In 1821 A.D. Kanjendal With reference to the fertility of soil &c, I from the
P. t. Dhuso 1875
