Valuation

1 Wet lands depend upon two Tanks. One is large & another is small. They are fed by the river "Mong Muttamady". The Tanks are around & the supplying channel is an influential one. The Mahajans say that 112 acres of land are as waste as of 10 years uncultivated lands. Some of them say that they are cultivated & not 10 years waste. The results of my go to prove that there is not much waste in the Village & the lands are cultivated annually to a vast extent. It is usual in every part of the County to leave some lands as waste from some reason or other. The Mahajans say that they have 112 acres of land as waste on guess. They again admit that all these lands are fit for cultivation. Soil is of a superior quality generally. Some of the lands are of alluvium character. Wet lands are not cultivated 2 times in any year within the last 20 or 30 years. Famine is raised in one or two years - upon the Tanks in Dry lands. On the whole the Village is in flourishing state. The lands are generally superior. The quality of Waters felt occasionally - as the district is noted for drought. Average profits of the Village are 620. Of the last papers 232-02 & Marum mud Angas 96 1/2. After settling a total of 328-82. The net profits are 292 Rs. I leave the matter of that the Mahajans offered annually 96 1/2 Rs. for Tank repairs for the consideration of the reviewing authorities. The net profits of the Village excluding the Marum mud Angas & well to a much larger sum than stated by the Mahajans including Marum mud Angas. The Mahajans calculated their profits at 2 Rs. per year on the sum of 1000 Rs. because when I came first to Pondicherry several Mahajans came into a large body before me & asked me to charge at 2 Rs. per year of 1000 Rs. I explained to them the details & principles of the settlement. Still they enter from their own profits on their own calculation. The average income of the person from 1st lands during the last 15 years comes to 62 - per acre. As the lands are good & the income is large, the Mahajans purposely reduced their net profits to a vast extent. In consideration of the fertility of soil & after entering into much details, I gave the valuation as follows with the aid of Mahajans - My principle is to argue with the Mahajans & fix value with them & make them to satisfy about the fairness of my valuation. B. K. S. S. S.

From this reason I may state I found the valuation with the aid of the Mahajans -

N^o 701 - 4 - N^o 702

1st Tank, at 187 Rs. at 3 1/2 Rs. per acre - 701

2nd Tank, at 111 Rs. at 3 1/2 Rs. per acre - 702
