

Angalam Kottai

The bonanzas are not recorded previously - Hence the one of 68 cents per acre  
- of 57 1/2 acres is situated within the proper limits of the Village - Hence the one of 68 cents per acre is  
- Father - All of them are enjoyed by the persons of 16, members of one undivided family -  
II The Reviewer of the person of 16 purchased the Village in A.D. 1858 & 1859 for Rs. 952 - from Panyar Tamm & Luvania Setty, the persons  
- who purchased the Village previously from the shareholders in the Village - Two Bails as on former Cojura Leases - Transactions proved to be bonafide -  
- Enjoyment proved - The sellers admit the transaction. The descendants of the Original Grantees also are alive. They admit the transaction -  
III Old laws depend upon one small Law. It is fixed by one of the Branch Channels of "Panyangor". The Tank is ~~in~~<sup>at</sup> restored after the Village  
was purchased by the persons of 16 who are most wealthy men among their Malabar Settles in Dorakatan. The persons of 16 say that the Dry & Wet Lands  
are uncultivated of 10 or 15 years but they were not fullwatered after they purchased the Village & that they are getting to be fullwatered;  
Four or five tanks are fullwatered ~~the~~<sup>at the old way</sup> 2 times annually -  
Rishabur is fullwatered only once - Soil is of a good nature & raised -

Vide preceding side

There are no materials to enter in the average assessment of the adjacent Agan lands -  
- The many really noted statement to well show the average well assessment of the -  
- Wetlands of the Kanganam in which the Village was settled - or settled - The average -  
- Dry rate of the very heavy crops varies from 1-1-0 to 0-11-2 per Acre -  
Average profits of the Village are 5-7-8 per Acre - This is not true - The dry valuation comes to the undermentioned sum, which is framed with reference to the state of the Village -

- 9 Acre of Wet, fullwater annually in season of double crop land, at 60 per Acre 54  
- 5 Acre of Wet, that will be brought under plough early at 20 20-10  
- 5 Acre of Dry fullwater annually at 10 per Acre 5  
15 Acre of Dry fullwater hereafter at 6 per Acre 90  
Total - 74-10-0
