Taluk

I. This is an insignificant Village. Wet lands depend upon two Tanks [illegible] they are in a poor state are fed by a single stream & by the tanks of the adjacent Ayan Village. The Mahazarnama says that 7 Acres of Wet Land are waste on Mattukkad. This is not true as it appears from the individual verification [illegible] of the Wet lands are [illegible] 2d time 1/3d of the Wet area. Punjah lands are cultivated annually in full. [illegible] No Vendrums exist. Soil is of a superior quality generally. No scarcity of Water is felt. Average income as per statement of the Ryots is 6-2-0 per annum. The [illegible] The contiguous Ayan Village is [illegible]. The average assessment of [illegible] Ayan Village calculated for a period of 13 years from F 1258 to 1270 [illegible] 6-11-8 per acre. This is poor assessment. In consideration of the [illegible] &c. I frame the valuation of [illegible] Village as follows:

Wet 10 Acres Cultivated [illegible] at 6½ Rs per acre 65

Wet 5¾ Acres partly cultivated [illegible] at [illegible] Rs per

Dry 3 Acres at 10 Rs per acre ~~at 10 Rs per~~ [illegible]
