Vibration.

III Wet lands in the Village depend upon one Tank of moderate size - It is in repair - It is -
- fed by a Jungle Stream & by the waste water from the adjacent Agri. Villages -
- The Tank is filled annually - Security of Water is not felt much -
- The person of 22/10/1860 appeared for the settlement of the Village states that 1/2 and 3/4 Acre of Wet are cultivated
- annually in an additional to ~~the~~ 5 Acre of Dry & annually he exaggerates the matter of waste much
- originally in his account - Some of the Wet lands are cultivated annually 2 times -
- Mangala & Pungala lands are ~~the~~ of a superior quality - They are ^{of} a medium character generally -
- The Village is in pretty good state - The average income of the Village is 50 Rupees per annum -
- This is not true - The contiguous Agri Villages are Malhal, Almaran and Vilanadum -
- The average Wet assessment of these Villages is - 9 Rupees 7 1/2 - 14 1/2 - 20 per acre respectively -
- The person of 22/10/1860 appeared for the settlement says that the soil of the Village is somewhat -
- inferior to that of the contiguous Agri Villages - The average Dry assessment varies from 12 -
- to 13 1/2 per acre - In consideration of the fertility of soil & I frame the valuation of the
- Village as follows -
- 1st to 6 1/2 Rupees per acre - 91 -

follows.
 • Wet 1 1/2 Acres full water at 6 1/2 Ropes per acre 91 —
 • Wet 3 1/2 Acres Waste on at 1 Rope per — 38 —
 94 - 8 - 0
 Dry 4 Acres full water at 1 1/2 Ropes per acre — 6 —
 Dry 3 3/4 Acres Waste at 1/2 Ropes per acre — 0 1/4 —

Total 474 —
