

சு ஸ்ரீ பதிமேதா

Yanapara
This is one of the villages in the pargana of Lugaung. Half of this village was granted for the support of a Buddhist monastery now situated in the Damaaram village of Tennavarozen Pudukkottai & the rest was granted to one Sadasiva Bhatter for subsistence as Damaaram. The former is a permanent grant while the latter is a hereditary grant. The monastery is especially the place for details regarding the Bhatter, given in the preliminary remarks written on a separate sheet & placed with this. The Bhatter post was has a Patta on plain of jagans. The bounoanis of this village are given there. The Patta taken about the area or about the bounoanis on the part of the King's Patta. The bounoanis now inserted in the vernacular statement correspond to those in the account of 1724. Hence the same are confirmed here & the 278 of the same are registered here.

known are registered as follows

II. The Damosararam portion of half Village-Committee of 17 $\frac{3}{4}$ Thuties of an equal balance of 17 $\frac{3}{4}$ Thuties equally & permanently -
• The lands are divided 20 years ago - Panchajayen 39-59 is paid on the number of Thuties equally & permanently -

III. The Bhow M. of 16 is ~~to~~ ^{to} be a descendant of the old Grantee - But she is unable to describe her relations with
D. H. M. whose name ~~is~~ ^{has} been registered in A.D. 1815 - (See subrule)

Valuation of the entire Village

90--"
97
93--" At the Range of the Cheyenne Indians first accounts. 97th the
village ~~was~~ measured to find out the boundary of the tract.
Comparison between the 1st account & the measurement account is given below.
The measurement account is admitted to be ~~correct~~ by all the parties having
concern therein.

Concern Return		After meal	
Wet	Dry	Wet	Dry
63-00	84-00	87-12	190-88
147-00		278-00	
Pennsylvania 67-79		59-18	
Remainder 97-21		218-82	
Wet fullen 69-00		67-82	
Dry Waste 11-82		17-08	
Dry fullen 11-20		5-60	
Dry Waste 25-20		128-32	

I cannot trust even the measured Accounts as the former is influential & the latter are not straight forward

However the measurement account brought the dishonesty of the Valued to light - The results of the measurement are adopted on the Settlement as they are admitted to be fair by all the parties having concern therein -

They are assisted & helped by all the parties having concern therein.
 The lands in this Village depend upon one Tank of large size. It is in repair. It is fed by a Jungle Stream - by the Waste Water of the adjoining
 The Tank is filled annually. Scarcity of Water is not felt even in ordinary seasons. (See enclosure)
