1. This is one of the villages in the Kingdom of Loango - Half of which is Portuguese & the remaining half is Agou - Originally in 1863 -

- These entire Village with 15 Hamlets were granted as Dammasanam to the person 13 for subsistence on one of the same grant or other.
Gradually 5 entire Hamlets & half of two Village together with ~~the~~ half of 10 Hamlets were resumed by the Zamindar & some of them were granted to Malhams.
- previous to the permanent settlement - Now the Malhams have half of this Village & moiety of 10 Hamlets belonging to the Village - or Dammasanam -
- The entire area of the Village & its 10 Hamlets is given as 836 acres & 52 futs - Half of this is Dammasanam or personal grant or the lands deducted from
the assets upon which the permanent settlement was based - There is an inscription cut on a stone in the temple of Kola Pillayar Govil in the Village under
- settlement & the inscription is the Potter of the Village. It contains the names of the Zamindars of this Village & those of the 15 Hamlets belonging to it in the account of 1724
which shows the boundaries of the Village embraces the lands of the Village of Nambarun & those of the 15 Hamlets some the ~~entire~~ Village of Kola
- Thus the discrepancy ~~is~~ is an error - This is now rectified by deducting the lands of ~~the~~ ^{five} Hamlets in which the Malhams have ~~a~~ nearly a full extent.

(1) The Dammamam portion consists of 44 large Villages & 44 minor Villages. The minor Villages
 are situated in Dammamam Taluk, Paranyjerual; Pudu Nusal; & Suvany Nusal -
 Previous to 10 years there were no minor Villages in this Taluk. In 1854 the persons N 19 to
 29 purchased the four large Villages above, just alloted to & formed the lands as minor Villages -
 Originally the Pampu on the Dammamam portion was 61 to 8 - which was raised to -
 184 to 6 - half century ago by the Dammamam. The increase in the Pampu is attributed to
 the increase in the Village. Now there is no Dammamam regarding the Pampu - Because
 the sum of Pampu 184 to 6 is adopted in the settlement. Of the sum 50 to 6 are paid to
 for minor Villages & the rest for the large Villages. The lands were divided long ago -
 The lands consisting of the 44 minor Villages remain undivided - The former are exchanged
 - once in 10 years. while the latter are not liable to periodical exchange -
 The Polls of this Village show that the Village was granted to the Dammamam various times & sect -
 through one Roush - The persons N 19 to 29 are not related to the said Roush - The persons N 19 to 29
 are descendants of Lubben who is entered as Original Grantee in the account of 17223 -
 & of the other some are descendants of the successors of the Original Grantee & others are
 aliens - (X)

1 One Mlingayana Mackay, son of Smith who owned 3 small tracts in the village, confessed that the relations of the persons who sold 15 large tracts - Holkrayen Pongoo to the Mlingayans as shown above in 1835 & 1846 & 1861 had no authority to sell the same as the power granted to them for maintenance - Upon the Mlingayans' request asked me to weigh the matter & admitted at the same time that the transaction is bonafide. It is clear that the Mlingayans' present relations to the lands to the Mlingayans long ago & that they are enjoying them undisturbedly - No proof to show that these lands were granted for maintenance - Makamasi Mackay, who sold the lands as is still alive - & the Brother of Makamasi today Panga & today Lemi is alive - The Mlingayans of the fact are claiming to the - Courts, should sue the sellers who are his relations - Hence the claim is rejected & the party is referred to civil court - The said Makamasi Mackay admitted under Bill of sale of 1846 of four tracts, or Pongoo, of the 15 Holkrayen Pongoo having sold to the Mlingayans as detailed above -

1 One Namienyar, the person of 15 of 16 claims to the person of 26 of 1866 on the ground that his late father who died 20 years ago mortgaged the lands to the person of 26 of 1866 twenty nine years ago - & failed to prove the same - It is proved that the father of the person of 15 of 1866 sold the lands to one Samar - in 1838 for Rs 266. & that the said Samar sold the same to the person of 26 in the same year for Rs 266 - The claimant admitted that the Bill of sale executed by his father to Samar is a genuine one - Hence the claim is rejected & the party is referred to civil court. The lands are in possession of the person of 26 of 1866 -

1 One Mlingayana Mackay of claims to certain lands to the Namienyar of Pannalan, & to the person of 26 of 1866 on the ground that his father who died 32 years ago mortgaged the lands to one Mlingayana Mackay, & that the Mlingayans usurped them (lands) about 15 years ago - in his absence from the part of the country - In proof of this he produced the Bill of 1847 which executed to his late father by the Mlingayans - The Mlingayans say that it is true that they sold some lands to the father of the claimant, but his father sold half the lands & mortgaged the rest to one Mlingayana Mackay about 20 years ago; that the mortgagor mortgaged the mortgage lands & sold the rest to one Namienyar - that the said Namienyar purchased the mortgaged lands from the claimant & sold with the other lands from the Namienyar - & that they (Mlingayans) purchased lands in 1842 from Namienyar - Hence the claim is rejected & the party is referred - The lands are in possession of the Mlingayans -

Valuation of the Dammamunpation of the Village

1 Wet lands in the village are irrigated by Tanks - Two are large & 8 are small in size - They are repaired - They are fed by a branch channel of the river. They are also fed by Dug wells & also by the waste water of the neighbouring village - The tanks are filled annually in ordinary seasons - The Mlingayans say that the wet lands are cultivated in favourable season & are left waste in unfavourable seasons - They agree that the Dry lands are cultivated in favourable season & are left waste in unfavourable seasons - They agree that the Dry lands are cultivated in favourable season & are left waste in unfavourable seasons - On the whole they admit that 110 acres of wet & 130 acres of Dry are cultivated annually in full - The Mlingayans say that 110 or 119 of wet area is cultivated in an average annually with 2 crops - Land is of a medium character generally - In detail some of the lands are of a superior quality & the rest are of an inferior quality - The Mlingayans say that generally most of the lands are irrigated with salt. This is not true - I have seen great many lands that are situated in the vicinity of the village - They are fertile - Punjab lands are cultivated with 2 crops - Some of the Dry lands, very small in extent, are cultivated & some annually - The average of the cultivation of the village is given in the following table -
