The bill of sale of 1850 are in the name of Pullayya, younger brother of the father of the present owner of 374 of 1850. He says that the lands were purchased from the present owner of 374 of 1850 from them. He says that he has not any interest therein. He again says that these lands (28 Tanks) are not in his possession & that they are always held by the present owner of 243 of 1850. Hence the lands are registered in the name of the present owner of 374 of 1850.

Valuation

IV. Wet lands depend upon two Tanks - They are not in thorough repair - They are fed by the Waste Water of the fields of the Agri Village of Majinaw, an important Village. The Tanks are filled annually. Quantity of Water is not felt generally. The Mahajanams say that of the wet lands some are cultivated annually & others occasionally grow want of repairs to the Tanks. - The Dry lands are said to be cultivated annually in full. The Mahajanams again say that the wet lands will be cultivated annually in full when the Tanks will be restored within the next 3 or 4 years - This is not true - The Village is surrounded by the important Agri Villages. The Waste Water of the fields of the surrounding Agri Villages would alone irrigate the small extent of wet lands in the Village - No separate Tanks are therefore required for the Village - Some of the wet lands are cultivated 2 times - Mangala & Pungu are lands of a superior quality generally. The average income of the Village is 5 Rupees per annum as per statement of the Mahajanams. This is not true - The contiguous Agri Villages are Vallabam & Pullayyamadai - The average yield annually of these Villages varies from 12 to 13 - per acre & 6-2 per acre respectively - The average Dry season varies from 12 to 13 - per acre. In consideration of the fertility of soil & the value of the Village as follows -

Wet 5 Acre cultivated at 6 1/2 Rupees per acre - 32-8
 Wet 1 1/4 Acre Cultivated at 2 Rupees per acre - 2-8
 at 2 Rupees per acre - 2-8
 Total 35-0-0

Dry 1/4 Acre cultivated at 1-2 Rupees per acre - 15-72
 Total 50-12-0
