Valuation -

III - - - Wet lands depend upon four Tanks of large in size - The Tanks are in repair - The tanks are fed by single streams -
 The Tanks are filled annually - Scarcity of water is not felt - The Mahajanams say that the Wet & Dry lands are partly cultivated & partly
 that the remaining lands are fallowed annually - Some of the Wet lands are fallowed annually - Some of the Dry lands are fallowed with Taragana
 The Mahajanams say that the Dry lands are fallowed annually but the Mahajanams of K. Ramachandraswami are purchasing the produce of
 they will settle the dispute by an action in civil court -
 Wet & Dry soil is of a superior quality generally - The village is in good state - Harvest is good generally - The average income of the village as per
 The Mahajanams is 90 Rupees per annum - This is low & unfair - There are many other villages contiguous to the Mahajanams
 The Agri village of Muddharai is the nearest Agri village which is situated at a distance of about 1 1/2 miles from the Mahajanams
 settlement - The average net assessment of that village calculated for a period of 15 years from 1855 to 1870 comes to 50
 The Mahajanams say that their lands & those of the said Agri village may be compared on par in points of fertility -
 The average Dry assessment of the said nearest Agri village varies from 5 13 8 to 5 10 9 per acre - In consideration of the quality of soil
 I frame the valuation of the village as follows - with the aid of the Mahajanams - I consider that the average assessment of the said village
 is somewhat low -

Wet 25 acres fallowed annually once & partly 2 times at 10 Rupees per acre - 250 -
 Wet 9 acres Muddharai, water at 1 Rupee per acre - 9 -
 Dry 34 acres at 12 Rupees per acre - 408 -
 Dry 5 acres at 1/2 Rupee per acre - 2 1/2 -
 258 - 1 1/2 - 26 - 120 - 185 - 12 - 0 - 4
 183 - 61 - p.
