II As the genuine Patta of the Village shows that the Village was granted long prior to the Firm and Settlement; as that is entered as Larva Mangene in the Mantal Account of 1223 as the Account of 1211 is not an authentic one, I cannot but arrive at the conclusion that this is one of the villages deducted from the assets upon which the Peishwah of the firm of Sevaganga was based & treat it as such - This is a Larva Mangene Village -

III The Rang's Valuel says that he has no materials to learn whether this is a service or personal grant, if not Agar - whether the holders thereof are doing any service or not - The Patta of the Manager of the Temple of Meenatchy forit at Madura wrote a remark on the memorial Register that the holders of the Village are not rendering any service to the Temple since long & that they should be made to fulfill the duty of the grant by reading Puranam - Copy of the Patta is placed with this for the information of the Reviewing officers - The Patta certainly shows that the Village was granted partly to read 3360 Tiruvittams by heart without reference to the Book & partly to reside in the Village in which the Temple is situated - These Tiruvittams are the "Vittams" should be read, forms a portion of the famous "Vittams" at Madura - Again it is said in the Patta that this is a hereditary grant - The Tiruvittams are to be read by Pondarams - The persons M-2-3 & 1016 are Pondarams - while the person N-5-1016 is a "Koyige Teyaga Bramin" who is not to read the service of reading the "Vittams" - It is evident from the fact of the adopted father of the person N-5-1016 having purchased 3/4 of the Village in A.D. 1823 & 1829 for Rs. 238 from one Pothakkings Pondaram; Teyagalinga - Pondaram; Arumogem & Teyagalinga - under two bills of sale on stamped papers, & of the Village having been held by the family of the purchaser free from service since the last 40 years - The sellers are the descendants of the Cyl Grantee - I see no possibility of cancelling the transaction of sale, nor to make the holders of this village to render service now when they were permitted to enjoy the village without doing any service - However as this is a service grant & as the service was discontinued 40 years ago as appears from the bills of sale, I recommended to confirm the village upon the present holders of the same on 1/4 of assessment - under Rule VII - The bills of sale proved to be genuine -

IV No Talk area about the Area or about the boundaries on the part of the Rang's Valuel - The boundaries of this Village are not recorded in any of the Accounts - The recognized boundaries of this Village which are entered in the memorial stated are confirmed here & the 29 Acre & 5 fathoms situated thereon are registered here -

(See next sheet)

II This Village is enjoyed as shown in the margin of the first side of the Register - The lands are undivided - No Pongee -

Valuation

VI - - - - Wet lands in this Village depend upon one Tank of moderate size - It is in repair - It is fed by one of the branches channels of Krittamala - one of the influential rivers in this District - The Tank is filled annually - Scarcity of water is not felt in ordinary seasons - In this Village all the arable lands are said to be cultivated annually some $1\frac{3}{4}$ times - Half of the wet lands are said to be cultivated 2 times - annually on an average - Panjola & Panjola lands are of superior quality generally - The soil is mixed with alluvium - The Village is in flourishing state - A few Kuntalas are cultivated with garden crops - Panjola lands are not yet to be converted into wet - The average income of this Village as per statement of the holders thereof is 100 Rupees per annum This is fair - I therefore confirm the average income as the valuation of the Village & distribute it as follows - There are not any other villages contiguous to this -

Sheet No. 1136

Register No. 969

Wet $12\frac{1}{4}$ Acres cultivated at 8 Rupees per acre 98 -

Dry 5 Acres & 40 Guntas at 8 Rs per acre 40 -

100 - 8

Annulated
