

Register No. 6

Sheet No 10

Salvation

1 Wet lands in the Village depend upon two Tanks. - One is large & another is small. 25
~~They~~ They are fed by the river Tinsulan an important source of irrigation now
 - in the District. The Tanks are in repair. They are filled annually. No scarcity of 26
 - Water is felt generally. The pump & bag that there are no ~~Wet~~ Wet in Dry lands. che
 - that they are full water annually, that Wet lands of 1/4 Acre flooded as waste are - se
 - washed away by the floods of the river which ~~are~~ surrounded the Village & that - 27
 - they are recovering gradually the fields thus washed away ~~five~~ years ago from ga
 - sand. The remaining wet lands are full water annually. 1/3 of Wet land area is - 28
 - full water annually & time of period only of the other 2/3. Paddy lands - ma
 - are full water only once. ~~Wet~~ Wet Dry is full water with Wet grain crop 29
 - Wet is full water with ~~Wet~~ Dry grain in this Village. Tobacco is raised in sw
 - ~~Wet~~ Wet Dry lands are of a superior quality generally. 30
 - The Village is in flourishing state. It was purchased for a very low price forty - ma
 - years ago. I see no ground for further improvement of the Village. - There are no 31
 - materials to enter here the average assessment of the agent Agent Village. The 32
 - amount. A grain on the 2 side of the first sheet shows the average assessment of 33
 - the ~~Wet~~ Wet lands of the Magistrate in which the Village under Settlement is 34
 - selected. The average assessment in the Village is somewhat high for a crop - 35
 - Average assessment of the Dry lands in the contiguous Agent Village is 11 5 per Acre 36
 - Average income of the Village is 200 rupees per annum as per statement of the Magistrate. 37
 - This is not true. It is not fair when compared with the fertility of soil & the extent of 38
 - the lands in the Village. In consideration of the fertility of soil & from the valuation 39

The Village as follows with the aid of the Mahajans
