Average rates of Government Salug's period

Aug 1-5-6
 Oct 4-5-1

Average value of grains of the town of wet land in Attikadungam
 consisting of 4 open villages in Tripatur Salug for a period of 15 years.

From 1250 to 1270	Cultivated area in acres	Grass pasture	Of which Quindars share at 45 per cent	Average prices of grains given in 184	Value of the quantities of grains given in 184	Rates per acre
1250-1270	6125-9	54670-3-1	24295-9-4	1-4-10	33688-2	5-8

The village is engaged jointly by the persons of 1867. This village was sold in AD 1855 by the Government of Madras in satisfaction of the Government debt of 1857 of 1855, in which the Government was the mother of the present Government of the village, to one Sivakum Pillai for 45 rupees. In AD 1857 the person of 1867 purchased the lands again from the said Sivakum Pillai for 45 rupees. Bill of sales on plain paper in brief - Transaction proved to be bona fide being duly proved.

Valuation

III. Wet lands depend upon tanks. One of these is large & others are small - they are in repair. The tanks are fed by the ~~open~~ tanks in the open villages of Niduppai & Tondy. The said open tanks are fed by a minor stream of which is not known to the village of the year 1867 who is appeared for the settlement. The village says that 1/2 acre of wet lands are full water annually & 1/2 acre of the wet lands are full water annually 2 times & sometimes, if the rains be heavier, the land is full water 3 times. Pungah lands are full water only once with Pargos crops. No garden crops are raised in the village - Harvest is moderate. Pungah & Pungah soil is of a medium character generally. Some of the lands are also impregnated with salt. The produce is fairly good. I have no materials to enter for the average assessment of the adjacent open lands. The average assessment of the village in which the village was settled is situated in 1857 - in the margin. The Pungah assessment of the adjacent open villages varies from 2-37 to 137. The assessment is collected on the crops of Pargos, Pungah & Pungah which are raised in the village. The village is in flourishing state. Average income of the village as per statement of the village of the year 1867 is 5000 rupees. This is not uniform to its full extent. In consideration of the fertility of soil & I give the valuation of the village as follows.

Faint copies

Wet lands full water annually, assessed value of the area full water 2 times annually at 10 rupees per acre - 7 1/2 Ann of Dry at 10 rupees per Ann - Total - 634-8-0
