The Vany[?] ... says that the Dryplands should not be confirmed upon the Enamdar as they are not entered in the Tetumar[?] Account. Though the Enamdar has no [illegible] ... it is proved that the whole [illegible] was in possession of the Enamdar. Hence I recommend to confirm the entire Enam upon the Enamdar.

This whole enam (Dry & wet) has now become a Sode Enam, and not Ardhamaniam — The Sode is levied as a permanent but a favourable Q. R. at the rate of 5 Fanams per Wet Varagadi and 1 Fanam for Dry Kani — Vide Sub Magtes Arzee 19th Decr. 1865 No. 38 —

In the Zemindar's account of F 1211, the Dry enam is entered at 4 Kanis — though five have been all along enjoyed —

The Valuation of this enam as per Sub Magtes data derived from the above account is for the wet 7-12-9 and for the Dry — 2-4-4 — which is accordingly entered — Vide Sub Magtes Arzee dated 26th March 1866 No. 10 —
