in the Agrobory Avenue, Pariza, N. Calif. from the latter in 1897. The following Naga Subbin appears to
belong to the race of the death of a long animal which took place about 30 years ago & that the former said Naga Subbin had
been killed in AD 1854. The person N 5410 of 186 - This is formerly documented & it is clear that the flower is rejected & the
reference to find point. The leafy white is in possession of the person N 5410 of 186 -

3^d ----- One Lenni Pindal Subbing is given of claims on Valley from the person of 15410/13 - on the ground that his late father who died 17 years ago mortgaged the one Valley about 20 years ago to one Nagewaruni. That Nagewaruni the grand father of the said Nagewaruni sold the Valley in AD 1853 for Rs 175 to the person of 15410/16 - The person claiming refers me to the Karamand of the Village dated so far back as 60 years - The defendant pleads that his ancestor had 2-14th Valley in this Village & that all of them were sold to them - In proof of this the defendant Nagewaruni produced a bill of sale executed to the person of 15410/16 by his father's younger brother Pambasirini, who died 10 years ago - selling 15th of a Valley and this bill of sale is dated 1868 - It is mentioned that out of his 2-14th Valley, No 15th Valley was sold - Bill of sale is on a stamped paper - The claim of the Plaintiff is not way proved. Hence the claim is rejected - It appears from the Karamand account dated so far back as 60 years that the ancestor of Plaintiff had one Valley in this Village. It is not known what became of it. The Plaintiff is referred to it for it.

Valeriana

III- - The lands depend upon 3 Tanks of moderate size - They are in repair - They are fed by Durg's streams - The Tanks are filled annually
scarcity of Water is not felt generally - The Mahajanams say that of some of the places as waste are left to follow that they are left
annually from one year or more - For the tanks are full annually & time -
Dry lands are full annually - Wet & Dry soil is of a medium fertility generally - Harvest is moderate Scarcity of Water is not much felt
The contiguous Agrar Village is Paanapur Paragora - The average wet assessment of that Village comes to \$970 per Acre -
The average was calculated for a period of 10 years from July 1865 to 1870 - No Taxation is raised in the Village -
The average income of the Village as per statement of the Mahajanams is 940 per annum - This is very low -
In considering the fertility of soil &c. I frame the valuation of the Village as follows - The Dry average assessment of the contiguous Agrar
varies from 515¢ to 570¢ per acre - Cargos are raised in the Village - in Dry Lands -
Wet 30 Acres full watered annually rice & partly 2 times at 5¢ per acre - 145 -

Taragons are raised in the Village - in Dry Lands.
 Wet 30 Acres full of trees annually raised & partly 2^d time at 5-8 per acre - 165
 Set of 1000 Warts at 10 per acre 7 172
 Dry 8 1/2 Acres full of trees at 12 per acre 68 66
 Total -- 178-6
