The Wet lands in the Village depend upon 3 Tanks of large size. They are in repair. They are fed by a Dugwell. The Tanks are filled annually in full. Tenacity of Water is not felt generally. The Range Valuers say that the Village was measured & the results of the same are entered in the Revenue Register produced in the office. The Village was measured at my request as I had no confidence in the accounts first produced. Comparison between the two Accounts produced by the Range Valuers is given.

As per 1st Account	As per measured Account
Wet — 21 — Acre	26 — 38 —
Waste — 15 — 82 — Fath	19 — 86 —
Dry fallow land — 112 —	231 — 15 —
Waste — 95 — 20 —	393 — 20 —

The Range Valuers say that the Wet waste lands are of 20 years waste & the Dry waste lands are of immemorial waste grown up with Jungle & that all these lands are fit to be brought under plough within the next 10 years. The Guernsey who measured the Village claimed the above waste lands as incultivated ones. It appears that the Dry lands of 393 Acre & 20 Fath were kept waste purposely to give an opportunity to the Guernsey to hunt in Jungle. Some of the Wet lands are cultivated 2 times. The quality of the soil is of average quality generally. The average income of the Village is 172 Rupees per annum for an extent of 1000 Acre. This is not true. The average will amount to the Village calculated for a period of 15 years previous 71270 comes to 5-8-0 per Acre. The Dry rating amount varies from 2-0-0 to 5-0-0 per Acre. It is known that the highest rating Dry amount is charged for cotton which is not grown in the Village. In consideration of the fertility of soil & the income of the Village I give the valuation of the Village as follows — The Revenue Register showing the annual income of the entire Village including the Dry lands. The entire income of the Village is 1000 Acre & 1000 Acre. The average Wet amount of the Village comes to 5-0-0 per Acre. The average Dry amount varies from 2-0-0 to 5-0-0 per Acre. The Range Valuers have made a mistake in their valuation. The Range Valuers have made a mistake in their valuation. The Range Valuers have made a mistake in their valuation.

Wet 21 Acre fallow land at 1/2 Rupee	10-5-0
Wet 20 Acre & 82 Fath Waste at 1 Rupee per Acre	20-4-0
Dry 231 Acre fallow land at 1 1/2 Rupee	288-72-0
Dry 393 Acre & 20 Fath Waste at 1 Rupee	387-1-5
Revenue	550-5-5
