M.B.

1 This is one of the Dammisaram Villages in the perrinsang of Perazanga. This was granted by Reromina Thappa Nayaker one of the descendants of the former Tirumala Nayaker of Madure. To whom & when it is not known. This is entered as Dammisaram in all the Accounts. No file was about the Area or about the boundaries the part of the Range's Vol. 1. The boundaries of the Village are not recorded in any of the Accounts. At the recognized boundaries of the Village that are entered in the ^{file} vernacular statement proved to be correct. The file confirmed here the 305 Area & 31 but situated there are registered here.

II - One Venkayya Pillai, Father of the Trustees of Sengganga Pannamunda Murthy Mattam at Madure complained that the holders of the
 Village encroached upon the limits of the Village of Terabhykul ¹⁶⁸ Conitairant ¹⁶⁹ must reside a Dyar Village rented out to the Mattam or
 permanent fowle by the National permission, about 168 Ann or 300 Kurumams of Dry 40 gaurage, but his friend complaining of this to the Collector
 about 7 or 8 years ago & that the Collector referred him to the first point by an endorsement dated 6 January /64 -
 The Defendants who are the holders of the Village pleaded that they never encroached upon any of the lands of the fowle Village of the complainant.
 & that the complaint is a fictitious one - These Defendants, again, produced an ~~authentic~~ authentic copy of an order of the collector dated 6 January /64 -
 issued to the Sub-Collector of the Town of Madure - From this it appears that the complainant, Trudley ~~from~~ or Pondaram of the Mattam,
~~made~~ made the same complaint to the Collector who referred the matter to the Moonyy of Sengganga for disposal by an arbitration -
 (Vide next case)

III. The person N^o 1 of 16 says that he is a descendant of the Engl^{ish} Grantee -
The father's younger brother of the person N^o 2 of 16 purchased 3/4 of the Village in Oct 1817.
In August 468 Gronow's venditor Eschewer, grand father of the person N^o 1 of 16 -
Bill of sale was a stamp of 1/2 an half. The person N^o 1 of 16 admits the transaction.
IV. The Village consists of 120 acres enjoyed as shown in the margin of the preceding page.
The land is undivided - Corn is paid on the number of that is annually & permanently.

Valentine

T.D. . . . All lands in the Village depend upon two Tanks - Of these one is large & another small - They are in repair - They are fed by Temple Streams - & by the Waste Water of the contiguous Villages - The Tanks are filled annually - Scarcity of Water & loss thereby is of rare occurrence - The holders of the Village possessed 60 acres of land & 76 acres of Dry as fallow lands & the rest as waste - Now before me at the time of the settlement, the holder announced any, particularly the person of 2 of 186, who is enjoying 3/4 of the Village, say that half of the lands possessed as waste are really under plough & that the remaining waste lands are of about 30 years uncultivated lands. I know as proved by my survey, that the holders of the Deernagpur Village co-^{old matters} aggerate the ~~waste~~ waste as usual - 1/4 or 1/3 of the total area is said to be cultivated and double crops annually - Kharif & Rabi crops are of a superior quality generally - The nature of the soil is red clay - No grain crops are raised in this Village - The Village is in good state - The holders of the Village are now getting to be converted into the The average incomes of the Village per annum - Rs 1000
of old Rs 1000

IV The average ~~day~~ assessment varies from 598 to 5116 p. a. acre. The highest day rate is charged for pulse - It is said that the crops are not raised to large extent in this village. The village is in good state. Soil is fertile. Harvest is good. The holders of this village say that the soil of this village is somewhat inferior to that of the village of Molakallur, where the average ~~day~~ assessment is 9727 p. a. acre. This seems to be true to some extent. I find the average ~~day~~ assessment of the contiguous Ayer village is higher. In consideration of the fertility of soil &c. I frame the valuation of this village as follows -

Rs 207
525

said & I give the valuation of the Village as follows:—
 - Wet-70 Acres Cultivated once in full & partly Exhausted at $7\frac{1}{2}$ Ropes per acre 525—
 - Wet-15 Acres Waste & at 2 Ropes per acre ————— 30

: Wet-15 Ann- Waste & at 2 Repus per ann ————— 30 535

- Dry - 200 Acres fall water at 10 days are ————— 125 —

- Dry 100 1/2 Waste at 40 p. an ————— 25-2- 150-2-

Total = 705-2-0.
