Table with columns for land area (e.g., 15/10, 15/12, 15/18) and land status (e.g., 1-02, 1-18, 1-5/8).

Table with columns for land area (e.g., 15/10, 15/12, 15/18) and land status (e.g., 1-02, 1-18, 1-5/8).

This is one of the Dhammasan Villages in the Zamindari of Tinjanga. This was granted by Bhuvaneka Thira Ponayen, when it is not known, to the person of 13 for subsistence. This is a hereditary grant. This is an uninterrupted possession of its holders since the date of the grant. This has one Patta. It was lost. In the English account of A.D. 1815, it is said that this Village has no Patta. In all the accounts, this Village is entered as Dhammasan. This Village is also known by the name of "Bhuvaneka Vinayapuram". This name is deduced from the name of the Grantor. The common name by which this Village is known is given at the head of this Register.

Table with columns for land area (e.g., 15/10, 15/12, 15/18) and land status (e.g., 1-02, 1-18, 1-5/8).

Reduced from the statement of the person produced by the Tinjanga Zamindar

Shanna Vidi, Saranam, Dikater, etc.

II. No Talk arose about the area or about the boundaries on the part of the Range Officer. The boundaries now erected in the demarcation statement correspond to those in the account of 1726. Hence the boundaries are confirmed here of the 19th June 1820. (Vide next page)

To be confirmed under Rule 11 of the 1st of 1820.

Valuation Sheet No 1571

II ----- Wet lands in this Village depend upon one Tank of moderate size. It is in repair. It is fed by the river Vaigyan. The channels of Vaigyan irrigate the Wet lands directly or in other words the channels run directly into the fields. These are termed in this part of the country as "Pattukals". As there are Pattukals in this Village, there is no need of the Tank. At the Vaigyan is our influential river in this District, no scarcity of water is felt generally for the lands situated within its influence. The Mahajanams claimed 135 Acres of Wet as fullwatered lands & the rest as Waste. They say that the waste is of 10 years old & that they may be fullwatered if they take some pains. They of course the entire dry Area as fullwatered lands. The result of my enquiry go to prove that there is some exaggeration in the matter of wet waste. It is true that in no village, entire arable area would be fullwatered annually. But these Mahajanams generally conceal some of the fullwatered lands & pass some as waste out of those brought on. The Register, for the sake of formality. Hence in most cases I am obliged to class the entire arable area as fullwatered lands & charge them as such. Some of the Wet lands are fullwatered annually. The lands thus fullwatered with double crop may be estimated at $\frac{1}{4}$ of the Wet area on an average. Vairala & Pungala lands are of a superior quality generally. The soil consists of alluvium & Regur. Alluvium is raised by the floods of the river. This Village is in flourishing state. This is Nararambaram Village & not Radarambaram. There are about 150 cocoanut trees in this Village. One or two Acres of Dry are fullwatered annually with garden crops. With all the above advantages, the average income of this Village is 579. Rupees per annum. It is affirmed that according to the statement of the Mahajanams this is not true. They to cause the Reviewing officers that in the Mahajanams of this part of the Country made a Rule to insert in the statement their average income at 2 or $\frac{1}{2}$ rupees per acre of Wet & that they are inserting the same. They are not thinking at all of their real or average income. Contiguous Agri Village is Turupia Satty. The average income of this Village for a period of 15 years previous to 1270 comes to 8-5-3 per acre.

Vide preceding side

- Pungala rates vary from 1-5 to 5-10 per acre -

- The soil of this village, the Mahaganams say, is somewhat inferior to

- that of the adjacent Ayer Village this is a usual story -

In consideration of the fertility of soil & I frame the valuation of the Village as follows -

Wet - 135 ~~per~~ ^{per} ~~acre~~ ^{at} 8 Rupas per acre - 1080

Wet - 14 ~~per~~ ^{per} ~~acre~~ ^{at} 2 Rupas per acre - 28

Total - 1108-0-0

Dry 24 ~~per~~ ^{per} ~~acre~~ ^{at} 1-4-0 per acre - 30

Grand Total - 1138-0-0

III. Our Sons Muttu Pannai, Nagalingam Pannai & Srinivas Pannai Pannai of Pannai 65/100 Datta on the ground that he has purchased them & failed to prove the same with the necessary documents & respectable witnesses they have not enjoyed in the Village. The people for 10/11 years & few others pleaded that the last of shares entered in the first side of the first sheet of the Register is not correct one. It is proved by the legitimacy of the Mahaganams that the last is a correct one & that every one holding the shares entered in the last sheet against his name. Hence the case is rejected. These disputes arose from party feelings - the names were rectified with the case & are placed with the full information of the Revenue Officer.
