II. Wet lands depend upon two Tanks of moderate size. They are in repair. They are fed by
 Temple Streams & by the waste waters of the surrounding villages. The Tank is filled annually.
 Security of water is not much felt generally. The holders of the Village say that 22 days of water
 are sufficient annually & the rest will be attended to occasionally. Some of the wet lands
 are cultivated annually 2^d time. Harvest is good. Pongol & Pongol soil is of a
 quality generally. It is of red clay description. No garden crops are raised.
 The average wet assessment of the contiguous Rythu Village is 873-2 per acre
 provisions to 7270, for which detailed accounts are available comes to 873-2 per acre.
 Pongol rates vary from 2-4- to 572- per acre. The highest rate is charged for grain
 which are not grown in the Village. The average income of the Village as per statement of the
 is 95 Rupees per annum. This is not true. No consideration of the fertility of soil & the
 valuation of the Village as follows. The holders of the Village complain that the soil of the
 somewhat inferior to that of the contiguous Rythu Village. I consider that the average value
 of the Rythu Village is somewhat higher.

Wet 25 days full water at 7 Rs. per acre 175-
 Wet 3 1/4 days at 2 Rs. per acre 7-0-
 Total 182-8-0
 Dry 17 days full water at 1 1/2 Rs. per acre 25-0-
 Dry 10 days water at 1/2 Rs. per acre 5-0-
 Total 280-0-0
