Vacc. 202 — Muthapparam & Nagaraguddi-Vilagam in the Taluq of Yennumuaram & Sivaganga Zamindari in Madura District

Sheet No. 691

Valuation

II ..... Soil: Lands depend upon the large Tanks - They are in repair - They are fed by a Jungle Stream & by the Waste Water of the important Ayen Village of Yennumuaram. The Tanks are filled annually. Scarcity of Water is not frequently - The people say that the Dry & Wet Lands classed as waste are Matteyed or the Lands cultivated occasionally - Some of the Wet Lands are cultivated annually & even Navarai & Punjah Lands are not of a very superior quality - The soil is of a Rich Sandy Harvest is good - No Vambu is raised in the Village - The Village is in good state - The contiguous Ayen Villages are Kumara Karuchy & Vany - The average Wet assessment of these Villages comes to 8-8-8 & 7-7-7 per acre respectively - The average of these two Villages, which is calculated for a period of 15 years previous to Fl 1270 comes to 8-8 per acre - The average Dry assessment of these Ayen Villages varies from 2-4 to 0-7-6 per acre - The highest rate is charged for Cotton - The Villagers Dry but the Cotton is not grown in the Village - Average income of the Village as per statement of the people is 246 Rupees per annum - This is quite false compared with the extent of Dry & Wet Lands & the fertility of the Same - After weighing the fertility of both I frame the valuation of the Village as follows -

Wet - 70 Acres cultivated annually once in full & partly 2d time viz			
6½ Rupees per acre		455	
Wet 12¾ Acres Matteyed & al 2 Rupees per acre		25-8	
			480-8-0
Dry - 100 Acres cultivated at [illegible] Rupees per acre		100	
Dry 94 Acres - Matteyed & al [illegible] per acre		23-8	
			123-8-0
Total			604-0-0
