III. Ponds are paid on the number of Bhattas equally & permanently - Ponds of Rupees 439-8-0 is paid for this & for another Village styled Nannanur belonging to these Malaganams in Camp. But as the two of these Villages are given separately in the account of 1721 & 1723 as the lands are situated far from each other & as there are distinct town series for these Villages, they are brought in separate Registers. In the English account of AD 1815, copy of which is forwarded to the Board of Revenue, the Ponds of Rupees 439-8-0 is split as follows -

1 Nannanuramangalam, Village under settlement, 50-5-0
 1 Nannanur 389-1-0
 Darnesam portion
 Total 439-6-0

III. Now the sum of Ponds of Rupees 50-5-0 is adopted in the settlement for Nannanur mungalam under settlement. It appears that the Village was granted originally to the person N. 1 of 1713 & others of Nana Gotra or Praminis of various families. The persons N. 1 to 21 of 1716 are descendants of the original grantee & the persons opposite to whose names the word standing character is marked down are descendants of the grantee of the original grantee. There are also others in 1716 -

V - ... The person No 33 of 16 claims 1/2 of a Vethi from the persons Nos 34-35-36 & 37 of 16 who are undivided brothers on the ground that the land is the property of the widow of the father of the deceased. The person No 33 admits that the deceased died 20 years ago without issue as a pious widow & that the land should be reunited to him being a legal heir of the deceased. The person No 33 admits that the land is in possession of the persons Nos 34-35-36 & 37 since the death of the deceased & that the persons Nos 34-35-36 & 37 of 16 are the cousins of the deceased, that the corpse of the deceased was removed by a person who is unconnected to the family, that the funeral of the persons Nos 34-35-36 & 37 of 16 were performed by funeral rites & that the person No 34 of 16 is performing her annual ceremonies - The person No 34-35-36 & 37 of 16 say that they are the cousins of the deceased; that she was a widow & that she was alive when they were born. VIII. The person N^o 14 of 1866 claims 1/2 Acre from the person N^o 1 of 1866 on the ground that his late father mortgaged it to the latter brother of the person N^o 1 of 1866 about 20 years ago. It is proved by the Mahajanams by an agreement executed by the person N^o 14 of 1866 to the person N^o 1 of 1866 that the father of the person N^o 14 of 1866 gave this land in gift to the latter of the person N^o 1 of 1866 & that the person N^o 1 of 1866 is enjoying it encuria. The person N^o 14 fortunately admits that the agreement is genuine. Since the claim is rejected & the party is referred to find a court.

IX. --- The person N^o 68 & 69 of 1866 claim 1/2 Acre from the person N^o 20 of 1866 on the ground that it was mortgaged sometime ago to the latter One Subbammal. It is proved that this is his property; that it was mortgaged to the ancestor of the person N^o 20 of 1866 some half century ago. Some of the Mahajanams supported the claim of the person N^o 68 of 1866; some supported the claim of the person N^o 20 of 1866 & some supported the claim of the person Subbammal. The 3 parties made arrangements that one of them should take oath & the other should relinquish their right. The person N^o 20 of 1866 who has possession of the land now & who pleaded that it is his property came forward to take oath & took it at the request of the person N^o 68 & Subbammal. Thus the latter both draw their claim. Since the claim of Subbammal & the person N^o 68 of 1866 is rejected & the 1/2 Acre is registered in the name of the person N^o 20 of 1866. The oath taken & taken was a private arrangement among the Mahajanams & the parties. In the District, I find that even in European Courts & before the civil court disputes are settled on taking the parties oath as to bind their conscience.

X. --- Well Cuts depend upon 3 Tanks. One is large & two are small. Of the latter, one is in use & the other supply water to the fields situated within the influence of the Tank. The one large & another small Tank are in repair. They are fed by Durgam Stream. The Tanks are fed annually. Scarcity of water is not felt generally. The Mahajanams say that 16 Acre of Wet land as waste are partly waste & partly "Mottur Kid" & that 67 Acre of Dry land as Pomburki are not fit for cultivation. Some of the Wet lands are cultivated annually & some are in fallow. The soil is of a superior quality generally. There are some inferior soil in detail. No Tambore is raised in the Village. The Village is in good state like the surrounding Villages. The average income of the Village as per statement of the Mahajanams is Rs. 1000. The average income of the Village as per statement of the Mahajanams is Rs. 1000. The average income of the Village as per statement of the Mahajanams is Rs. 1000.

The old Castles depend upon two Tunnels - they are in repair - they are fed by Ling's Stream -
 & they are also fed by Lockwood's Spring - The Tunnels are getting annually -
 Security of Water is not much felt - The Mayor complains that the houses flanked as waste and that
 some of the old lands are fast getting annually - The River is small & the fortification
 of the Village - is falling away - The average old amount of the last 13 years of the year Village -
 comes to 5572 - per cent - This is somewhat higher than the average of the last 13 years -
 inferior to that in the other Village - The average amount of the Village as per statement of the
 year 1866 is 66-6 - This is not true - After making the fertility of soil & from the
 valuation of the Village as follows -
