The person N^o 3 p^{er} 16 purchased 1 Valley at \$81850 7851 & 1855 for 99 yrs 43 4 4 ~ from -
one of P^{er} 16's ^{old Village lot} ~~ancestors~~ ^{&c}, whose ancestors purchased lands from one of the descendants
of the Ogle Grantee. One bill is on stamped paper leaf & 3 are on plain paper leaves.
The persons N^{os} 8 to 16 p^{er} 16 - their ancestors purchased these lands long ago. No documents -
The transactions are admitted by the descendants of the Ogle Grantee, who are p^{er} 16 =

Valerian

III - --- Wet lands depend upon one Tank of large size - It is in repair - It is -
fed by a single Stream. The Tank is filled annually - Scarcity of Water is not generally felt -
The persons who say that of some of the wet lands as waste are mistaken - No Pungah lands -
in this Village no Pungah crops are raised in it - Some of the wet lands are cultivated 2 times -
The lands thus cultivated is estimated to be $\frac{1}{4}$ of the Wet Area - Harvest is ~~very~~ good -
Soil is of a superior quality generally - The contiguous village is Paranguray -
The average Wet annumment of that Village calculated for a period of 14 years from July 1256 to 1264 & from July 1266 to 1270 -
for which returns available are 5600 per acre - The average income of the Village as far stated of the Mahazamans is 145 Rupees for annum -
This is not true - The Mahazamans say that for some of the lands of the Zamans an annual settlement may be placed on par with those of the contiguous -
Village lands - In consideration of the fertility of soil &c - I frame the valuation of the Village as follows -
Wet 40 Acres cultivated once annually & 2 times partly at 6 Rupees per acre 240 -
Wet 90% Acres cultivated 2 times at 30 Rupees per acre 270 -
Total 269-40
