Valuation

III. Wet lands in the Village depend upon one large & 3 small Tanks - They are all in repair. They are fed by League Streams known by the name of Topper - They are filled annually. Fertility of Water is not felt generally - The Village is in flourishing state. Soil is good -

The Valuel of the persons in Feb. 1873 sum of 273 Ann of 1000 as full water lands & 54 1/2 Ann of 1000 as waste. The result of my enquiry into the most experienced persons who fortunately attended my office at the time of the settlement say that there is no so much waste in the Village - That the Valuel of the Polygon among granted the matter of Waste - It appears that in hot weather the water in the supplying channel is somewhat brackish - The soil is not very superior quality -

There are some barren saline lands - Some of these salt lands are cultivated annually & some of the salt area is sown & cultivated annually on an average. No dry cultivation in the Village - Five Ann are cultivated with garden crops. Waste lands are yet - One full water early if the one of the small Tanks which is in disrepair be restored at a cost of 200 Rupees - The Village is in mortgage for 20000 Rupees - The annual income of the Village is

[illegible][illegible]

The above power required these lands in 1858 from a gift -
 Jose Gornay Vallabon Tena, son of younger brother of grand father of the party of 16 -
 whilst he was Poliguo Tena died & left in on simple fagons. The Valued of the party of 16. admit the
 validity of the transaction & genuineness of the documents & but please to let the transaction may not be admitted -
 by reason that for the said Gornay Vallabon Tena alienated these lands without the consent of his copartners -
 He admits that the lands are in possession of the alienance. Hence the plea of the Valued is rejected -

One fishbone barrel Purwai is averaging $3\frac{1}{2}$ Penn-gals - J. L. B. 27
 a fine barrel - W.D. 183 from Bethel Polyan
 yields 201 - full 9 cals. is on shipping - 26 W. 64
 a fine barrel - W.D. 183 from Bethel Polyan

Average value of grain of the town on wet land in Sullivan
Magowan consisting of 49 villages in the State of
for the period of 15 years-

From 1256 to 1770	Cultivated area in acres	Gross output	Of which Gumder's share at 46 percent	Average price of Gumder	Value of the quantity of Gumder in Rs.	Rate per acre	
1778-8-8	3197	77	32943-9-4	14450-11-1	1-7-5	21337-5-4	8-15-11

Fair copies

-1600 Rupees as per tent of the Collector of the py 16 - This is not true -
The contiguous Agre Village is Kannur - The average land assessment by the Village
of Agre for a period of 15 years previous to 1870 comes to 7 Rupees per acre -
The said Kannur is a small Village - The inhabitants of the adjacent Village says that the
village is capable of yielding about 3500 Rupees at the present high prices -
The present high prices are of no use in forming the permanent valuation of the land
There is a Farmanam named Yelayandayuse contiguous to the Py land of Agre
has been charged at 7 Rupees per acre. In consideration of the fertility of soil &c
The valuation of the Village is framed as follows -

- 7 Oct - 300 Acres full water at $7\frac{1}{2}$ Ropes per a — 2250 — a 67
 - 1 Oct - 38 $\frac{1}{2}$ Acres of Sash at 1 Rope per a — 32 — 8 —
 - Garden lands 5 Acres at 7 Ropes per — 35 — 0 —
 Total - 2317 - 8 - 0
