I think the accounts produced by the Nany's Vaikal satisfactorily show that the
 Dammasanam portion was purchased for the Temple & that it is held even
 since for the support of the Temple. The Alloganams of the adjacent villages say
 that the family of the Ogl Grantee is entitled & that they bear the
 Dammasanam portion was purchased for the Temple & that they know that it is
 held for the support of the Temple. Hence the Dammasanam portion is confirmed
 on 1/8 of assessment.
 No talk about the Dasa or about the boundaries or the part of
 the Nany's Vaikal. The boundaries are marked in the remainder statement
 correspond to those in the Account of 1724. Hence the boundaries are confirmed here.
 of the 49 An 415 feet situated there are registered here.
 In the English Account of A.D. 1815, the entire Village is entered as the property of
 the Temple as it was then in possession of the same. It is satisfactorily proved -
 by the former accounts, that half of the Village is Dammasanam
 The Devastanam portion of half Village is free from all tax - The Dammasanam
 portion of half Village bears Burge of Rupees 20-4-0

Valuation

V. Wet lands in this Village depend upon one Tank of moderate size. It is in repair. It is fed by a Temple Stream - It is filled annually. Scarcity of water is
 not felt in ordinary seasons. Vengal lands are cultivated annually in full. Of Pungel lands 25 An 400 feet are planted as waste & 1 An 968 feet are planted as
 cultivated lands. Some of the wet lands are cultivated annually 2 times. Vengal & Pungel lands are of superior quality generally. The Village is in good state.
 The average income of this entire Village is 67 Rupees per annum as per statement of the former. This is not true. The Vaikal also says that this is not true.
 There are Ayer Villages contiguous to this - There are Dammasanams contiguous to this which were already settled & valued with reference to the rates of the contiguous
 Ayer Villages. Now I frame the valuation of this Village with reference to the rates adopted for the contiguous Dammasanams -

Wet 32 An 435 feet cultivated at 6 Rupees 194-1-6-
 Dry 2 An 400 feet cultivated at 1 Rupee 2-0-0-
 Dry 5 An 400 feet cultivated at 4 Rupees 1-5-2-
 Total 197-6-8-
