II This Taluq consists of 5 equal Taluqs - They are enjoyed as shown in the margin - The lands are divided permanently. Pore is paid on the number of Taluqs, equally & permanently.

III The persons of 16 are disowning the old Grants - The persons of 3 & 4 of 13 are some of the persons of 1 & 2 in the said Taluqs. No sales in the Village -

Talukations

IV. --- Wet lands depend upon one Tank of moderate size - It is in repair - It is fed by 2 Jungle Rivers & by the Waste Water of the adjacent Villages - The Tank is filled annually - Scarcity of Water is not felt generally - The Mahajanams say that 32 Acre of Wet & 30 Acre of Dry are cultivated annually - & that the remaining lands are of long Waste fit to be cultivated - Some of the Wet lands are cultivated annually 2 times - The extent thus cultivated 2 times is said to be equal on an average to 1/2 of the Wet area - Wet & Dry lands are of a superior quality - The Village is in good state - The average income of the Village as per statement of the Mahajanams is 94 Rupees per annum - This is not true - There are no other Villages contiguous to the Village under Settlement or within a distance of 3 or 4 miles - From this Village - This Village is situated in the Mahajanams of Sambharum - The average Wet assessment of this Mahajanam comes to 8 & 3 per acre - This is very high - The Dry average assessment of the Mahajanam varies from 2-13- to 9 Rs per acre - In consideration of the fertility of soil & I frame the valuation of the Village as follows - with the aid of the Mahajanams -

old highest old
The Dry average
assessment of the
Mahajanams is changed
in 1000 Villages only
for small extent of
lands which are cultivated
with cotton & which
are not full water in the Village
