Valuation

Wet Lands are irrigated by one large & another small Tank – They are fed by the Waste Water of the Tanks in the Villages of Kannangad & Pillayanadal in Jayangondam Taluk – The Tanks are fed annually – They contain water for 2 years – Wet Lands are cultivated annually in full except 5 or 6 Acres for left waste from one cause or other – The Dry Area is of a highly one – One eighth of the Wet Area is cultivated occasionally & three Years – The Water is felt occasionally throughout generally – Soil is of a medium character generally – Harvest is generally good – The Village is on the borders of Pattukkottai Taluk – The Village is in good state – I am not certain whether the average assessment of one Village situated about the Damaramam under Settlement – The Maganam average assessment is which the Village is situated is given in the margin – I consider that the Maganam average assessment is better than the Pattu of one or two Villages – The former consists of both the inferior & superior soil – In any case the average assessment of the Zemindar is high & it is not moderate – Hence a deduction is necessary on the part of the settlement Officer – Average assessment of the adjoining Dry & Wet lands is 0 1 3 7 Maram & 9 do Minam – Dry lands in the Village are cultivated with Varagu & No Garden crops are raised in the Village – The average income of the Village as per statement of the Jenmy is 16 — is 1590 Pagodas per Annum – This is not fairly compared with the extent of the cultivated Lands & the fertility of the same – In consideration of the fertility & soil & the Ryotwary of the Village as follows – with the add of the Jenmy of 16 Rs

Acres – 48½ Wet entire area – in consideration of the small extent Cultivated & three at 5 Rupees per acre — 242-8

Dry – 2 Acres at 1 Rs per acre — 2 —
