No 1

Register No 128

Sheet No 136

This is one of the Darmasanams in the Zemindary of Sivagungai – This Inam was granted by the Zemindar in 1011 to the person No 13 – for subsistence – This is a hereditary grant – This is in uninterrupted possession of its holders since the date of the grant – It has a Pottah ~~[illegible]~~ – The Village is supported by all the accounts of 12 – No Takarar about the area nor about the boundaries on the part of the Zemindari Vakeel – Hence the area of 90 Acres & 62 Cents is confirmed here. The boundaries mentioned in the Vernacular Register correspond to those in the accounts of Fusly 1244 – The boundaries in the Pottah which appears to be a registered one by the account of A D 1815 correspond ~~exactly~~ nearly those in the Pottah – The boundaries in the Pottah are vague – This Village consists of 5 equal Vritties – They are divided this year. The lands are exchanged once in 13 years – Poruppu is paid on the number of Vritties equally & permanently –

The persons 16 are descendants of the Original Grantee. There is a serious dispute regarding the shares in this Village. The remarks for No 32-33-34-35 & 36 in the Darmasanam Village of Vellakkai apply to the persons 16 – being the same individuals – Poruppu is fixed of Rupees 31-2-6 to the Zemindar since the last half century – No Takarar about the Poruppu. Hence the sum of 31-2-6 is adopted in the settlement – (Vide next page)

Valuation

1 Wet lands depend upon 3 Tanks of moderate size — They are fed by the waste water of the fields of Manalur, Devastanam Village & by other adjacent Ayan Tanks — The Tanks in this Village are in repair — The Mirasidars classed large extent of lands -viz 53-85 as Poramboke & wrote a remark in the Register that they are not fit for cultivation — The Mirasidars say that the wet lands of 7 Acres classed as waste are Mattikkad — This may be depended upon to some extent — But I am afraid much lands are classed as Poramboke — 1/6 or 1/5 of the Wet area may be said are the lands cultivated 2 times on an average. No Punja lands in this Village — no Vanbori is raised in it — The Village is in good state — I have no materials to enter here the average assessment of the adjacent Ayan lands. The average assessment of the Mirjaram in which the Village is situated is given in the margin — The ~~dearth~~ scarcity of Water is felt generally — Average profits of the Village as per statement of the Mirasidars is 71 Rupees per annum — This is quite false — With reference to the fertility of soil I propose the valuation of the Village as follows —

Wet 30 Acres cultivated annually, in consideration of the lands cultivated 2 times at 5 1/2 Rupees per acre } ~~[illegible]~~ ~~[illegible]~~ 165 —

6 3/4 Acres of Mattikkad & at 3 Rupees per acre — 20-4-

Total — 185-4-0 One hundred & eighty five rupees & four annas
