[Faint handwritten notes, mostly illegible due to fading.]

The purchase of the Village of Littleton & Kelaung
The Dammourans of old Littleton & Kelaung
to which the Dammourans under settlement
considered the same as the original -
The above transaction proved the true fact -
The payment of the paper is also proved -
The paper was accepted about 27 years
ago by the Father Elder Brother of the village.
The paper was recommended over
to be confirmed in the name of the
Governor of the Village of Littleton & Kelaung

1 Wet lands depend upon one large Tank 2 1/2 miles fed by 1/2 the branch
channels of the Antennala river - This is an insignificant river - The Tank is in respect
The 1st 16 acres, at 36 acre 1/2 of land as waste are 1/10 all year -
- small water courses from been being impregnated with the salt & that they are fit to
cultivate any time & that they will produce security produce - The acres to be true to
some extent - Some of the wet lands are cultivated annually 20 times to extent there
cultivated is used to be 1/10 of the wet area - No timber is raised - Soil is of
- a superior quality generally - The father of the 1st 16, increased the drainage very much
to 2 years ago - Punjab lands also are of a superior quality - No Rajm Valleys can be
to the Dammamam under settlement - Hence the average assessment of the

May arise in which the Danmessoan under Settlement is situated is given in the survey.
This assessment is some what high. It includes ^{some} the double my lands.
The average my assessment of the open villages situated at some distance from
the village under settlement is 5-6 to 7-6-3 = Average value of the Villages
as per statement of the H of 18630 Rs per annum. This is not very low. It is a consideration
of the fertility of the soil & in France the valuation of the villages as follows -

Det 108 dense forest water usually abt $5\frac{1}{2}$ ° open space $59\frac{1}{2}$ °

II From the Patta of 1816 ~~copy~~ of which is filed with this it appears that this Devasthanam Village which was given up with the temple was given to the ancestors of the Plaintiffs that they are to enjoy it & improve the Village & enjoy the same paying each cent annam to the temple on the 1st of Angkor actually collected annually. From Mr Blackburn's Patta dated 29 June 1847 from his endorsement to the Plaintiffs dated 6 October of the same year which is in the following tone,

"The Principal Collector of Madras has been directed to allow the village of Palayem to remain in the possession of the persons enjoying it, the Payas which it belongs deriving the benefit of the Porambo from it."

It appears that the Temple Village is being held by the Plaintiffs as tenants or cultivators & that the Village do still belong to the temple of Piramanna. Hence the Village is registered in the name of the temple & the request of the Plaintiffs that the Village should be registered in their name is ~~not~~ ^{not} complied with.

III No Talk ann about the boundaries on the part of the Nany's Village. The boundaries now inserted in the memorial statement correspond to those in the Patta of 1816. Hence they are confirmed here & the - 367 A & 43 A. are entered here.

IV The Temple is in the management of the Nany - with the Village appertaining thereto -

V This is Serramangalam Village. The revenue is collected annually with reference to the extent of fields under from the temple & the revenue is paid to the temple & it should be appropriated to the use of the temple. The average is calculated from the extent of the fields & is paid by the Plaintiffs during the period of 10 years from 1861 to 1870. This is a description of the average value of the entire village & the average value of the entire village is 400 Rupees per annum. The average value of the entire village is 400 Rupees per annum. Hence I confirm the value or amount of the Village as 400 Rupees.

Sheet No. 888

as given in the account of 1721, & the
account of 1722 while the Navajo Vakeel bases his claim on the Patta & on the account of 1721 & 1722. It is a known fact that the account of 1721 is not a true copy of that year.
The Navajo Vakeel asserts the government of the Patta. It is a known fact that the account of 1721 is not a true copy of that year.
As the Patta is a genuine one, as the holders of the Village are uninterrupted possession of the Village since the date of the grant, as this was granted previous to the
Permanent settlement & as this is entered as such in the government
Account of 1722, I recommend to class this as the one.

Account of Feb. 11, 1836, & was
deducted from the assets upon which the Permanent Fund
was based & trust it now stands subject to the Conf
of the Revenue Officers. In an account or list of re
alignations forwarded to the Board on the 11th of March
letter dated 17 February 1838, this Village also is entered -
This is not one of the recent alterations on the granted endow
to the Permanent Settlement. As the list was prepared without
looking into the Pottas, merely from the accounts of the Zemindars
this Village is entered as a subsequent grant -
(Vide next end)

V - Wet lands depend upon two Tanks of moderate size. They are in repair. They are fed by Janghel streams & by the Waste Water of the adjoining Villages. The Tanks are filled annually. Scarcity of water is not felt generally. The person of B. says that 21 Aug of Wet & 60 Aug Dry are contemplated annually & that the Aug of Wet & 28 of Dry of course as waste are partly settled & partly waste of 10 years & that they will be full water shortly if they meet. They attribute the Waste to the want of repairs. The results of comparing show that this is not true - as usual. It is the policy of the Mahabharana of the part of the Country to place as full water lands those that are entered in the Fatiman account & of keep the rest as waste till the full water. Some of the hills are full water annually 2 times - 1/5 of the Wet area is said to be full water 2 times or even an average. Famine is rare in all parts here. Mangal & Punjab lands are of a superior quality generally. Soil is "Harial" or Rayer. It is said that no portion of Punjab lands is fit to be converted into cult in future. The average income of the Village is 90 Rupees per annum. This is the case - The contiguous of the Village is Yashwanthar & Yashwanthar. The average Wet amount of this is 100 - The contiguous of the Village is Yashwanthar & Yashwanthar. The average Dry amount of this is 100.

None

a. of these ~~was~~ invaded grants generally & is required with reference to the present. ^{to}
 "deprived condition of the Estate, the Board desire to entrust you with a liberal
 "discretion in attending & regenerating the lands, which they trust will be done
 "with due consideration to the circumst^{ances} of the present possessors & the
 "means of support." XXX In the last the Range of this Village is entered as 5 & 6
 It appears ^{that by the statement of the} from the head of this Village & by of the Range's Vakil that this is an
 Parwa Manjeras Village & that the pargana of Rupees 5 & 6 was collected by the
 Genuwar for sometime ^{ago} & it was remitted long ago -

III In the Polling this village it is stated that this is a personal favor
to enjoy the Village hereditarily.

IV. No Talk was about the Area or about the boundaries on the part of the Range's Valued. The boundaries now inserted in the memorial statement correspond to those in the Account of 1724. & in the Patent. There is some difference in the boundaries inserted in these two documents. The holders of the Village say that they are on the same on the spot. Hence the boundaries are compared with the 1724 Survey & 60 feet situated there are right & true.

Valentine

son two Tanks of moderate size. They are in repair. They are fed by Pumped Streams -
 joining the lakes. The Tanks are filled annually. Scarcity of Water is not felt generally
 of Feb. & 40 being Dry are cultivated annually & that the Aug. & 20 of Dry & 60
 & partly waste of 10 years & that they will be full water shortly if they meet -
 the want of crops. The results of comparing show that this is not true - as usual -
 some of the part of the Country to place as cultivated lands those that are in the
 & as waste fit to be cultivated some of the hills are cultivated annually & twice -
 & twice on an average. Tobacco is raised in an large area
 superior quality generally. Soil is "Barical" or Rayer. It is said that no portion
 is not in future. The average income of the Village is 90 Rupees per annum
