This is one of the Villages in the Shwagunza Estate. It is a personal grant. The names of the original grantor & grantees are not known. This is one of the 29 Villages which were formed into a Sub Division & granted by the Government of the persons in Column 16. An authenticated copy of the grant dated 12 November 1918 was produced. In this process - dated 27 May 1912, the Board have sanctioned the registry of the Sub Division.

There is no dispute about the area or about the boundaries on the part of the French Agents and accountants.

The boundaries marked in the vernacular statements rendered by the Indians to those in the grant, shown in Column 12. Hence the boundaries are con-
32 acres & 95 cents situated therein are registered here.

Wet lands are irrigated by a tank which receives its supply of water from
thermalagundi. The tank holds 3 months' supply of water. Soil is partly of superior
kind & other second crops are occasionally raised. The average income of the
of the Immundars amounts to Rs 100. This is not too low. I would
of the soil raise it to Rs 120. I have ordered the Village to
to the holders thereof having appeared for the Immund settlement
- 90 - from the date of attachment.
