

And now my dear friend

The father in law of the person No 1 of 1860 purchased the Village in 1855 for \$500.
 Subba Rao & Co. Two bills are on stamped paper. The father in law of the person No 2 of 1860 who appeared for the settlement says that he does not know how the
 the persons who sold the land. When acquired them previously nor ^{it could be} he produce the sellers. The father in law of the person No 1 of 1860 says that he gave the 3/4 Village to his son - in law the person No 2 of 1860 - & that it may be registered with - the person No 2 of 1860.

The Valuers the p. 16 who appeared for the settlement says -
 know how the settlers acquired the Village - nor could he produce state
 who attended the bills of sale, ~~but~~ are living - I sent summons to the witnesses
 & among whom were found by the summons. None but they refused to attend the
 that they are still ill - I could not find them subsequently. The persons who appeared
 for the settlement says that he and others cannot produce even the receipts granted by
 - Government servants for the payment of Revenue - On the whole it appears that
 by the testimony that the settlers are descendants of the Ogl. Grantha. Hence I
 bills of sale are on stamped papers & hence I would recommend to complete the
 to the p. 16 on 1/2 of amount. In the Village is no information of the
 p. 16 is

Valuation

II Wet lands in the Taluq depend upon Tanks - which are round in strength - They are in repair
 They are good for growing Rice. The Tanks are getting annually - The holder of the Wells
 - 13 An of Wet as cultivated lands & 8 An & 28 fath as Waste for the cultivated
 - The results of my enquiry go to prove that there is not much waste in the
 - Some of the Wet lands are cultivated annually - Some - Soil of middling fertility
 - Mahajonams say that there is no excess in the Wet area - no is there any dry area
 The average income of the Village as per statement of the holders being 34 Rupees per annum. This is quite
 false. The contiguous Ayer Village of Tellogu. The average Wet assessment of the Village is - 6-4-8
 The soil of the Village is not any way inferior to that of the contiguous Ayer Village - In consideration
 the fertility of soil & I frame the valuation of the Village as follows -

Wet - 17 An. Cultivated at 6 Rupees - 102-
 Wet 4 An & 28 fath Waste at 1 Rupee - 4-4-6
 106-4-6
