V. ... One Subramanyam Setty claimed two thirds from the person No 5 of 1866 on the ground that these lands are his property. The claim is entered in the record on statement of the person No 5 of 1866 & the Comptroller settled the dispute amicably under a written agreement on a stamped paper of 8 pages & signed dated 6 April 1866. According to the agreement, the person No 6 of 1866 assigned his share in the ^(1/3) thirds, entered opposite to his name & the Comptroller relinquished their right. Person No 5 of 1866 provided to the person No 6 of 1866 a document by which the person No 6 of 1866 is in possession of the person No 5 of 1866. This document is not attested with the signature. The same is signed by the person No 5 of 1866.

VI. ... Wet lands depend upon one large tank. It is irrigated by one of the rivers called Koppal and by the waste water of the village. The tank is filled annually. Quantity of water is not full. The village complaint the person No 6 of 1866 claimed 21 acres of wet as the best the tank among the claims of Ponnaboli. & gave the account saying written Koppal that these lands are irrigated for full water. Wet lands of 35 acres that are placed as arable lands, are full water annually in full. Some of the lands are full water annually & some are full water once in full & partly 2 times at 6 Ropes. Some or two acres of dry are full water annually with the full water under the tank. The lands are of a superior quality, generally the village is in pretty good state. The average income of the village as per list of the person No 6 of 1866 is 123 Ropes per annum. The contiguous village is Ronagarai. The adjacent village is Radem & Pongud. The average wet assessment of the village of Ronagarai is 6 Ropes per acre, calculated for a period of 15 years previous to 1870. & the average wet assessment of the said adjacent village of Radem & Pongud is 6 1/2 & 6 5/8 per acre. The person No 6 of 1866 says that the soil of the village may be placed on par with that of the contiguous & adjacent village. In consideration of the fertility of soil & the position of the village, the valuation of the village is as follows:

Wet 25 acres full water once in full & partly 2 times at 6 Ropes.	} — 21 0 —
per acre
