True Copy

James half of the Village is registered upon the person #1 of 1816 & the money half is confirmed upon the Rany of Perunganga as it is in possession of the person since the last half century. The Rany is willing to purchase the half Village confirmed upon person #1. No. 10. The area or about the boundaries on the part of the Rany's Village. The boundaries correspond to those in the account of 1816, the boundaries in the latter differ to some extent to those in the account of 1844, the siding of the Village being that they are one & the same. James the 3d. of 1816 is confirmed here. The Rany of the Village is entered and 14 1/2 in the account of 1844. The person is not paying Rany for his half Village and is in possession. The person #1 of 1816 is paying for his half Village Rs. 14 1/2. At the rate, the Rany of the Village comes to 28 13 6. There is also a small land in Nellar.

III. The person #1 of 1816 is a descendant of a person #1 of 1816 in the Rany of Perunganga. The half Village which was in possession of his predecessors is registered in the account, as the half Village is in possession of the person since the last half century. There is it asserted unlawfully to them originally.

Valuation

IV. The land is divided into one Tank. It is in repair. It is fed by a Jungle stream & by the Waste Water of the other Village Tanks of Nellar. It is fed by one of the Jungle streams. The Tank is filled annually. Scarcity of Water is not felt generally. No Jungle land is cultivated in the Village. Jungle lands are cultivated annually in full except a few Acres here & there occasionally are left waste from one cause or other. Some of the lands are cultivated annually 2 times. Jungle lands are a mixed character generally. The average income of the Village as per statement of the person #1 of 1816 is 74 Rupees per annum. This is not true. The average income of the half Village that is in possession of the person comes to 40 Rupees per annum. In considering the fertility of soil & I found the valuation of the Village as follows -

Set 20 Acres full water at 5 Rupees per acre 100 --
Set 2 Acres Waste at 10 Rupees per acre 20 --

Total 120

James Wm.
