As the figures in Col. Candan's list of "Varraspett" represent the quantity of
grains for which some of the lands have been rented out, and as the gross
outturn of the Villages thus rented in kind is not known, the 4th
col. is left blank - A. L. D.

Valinori

There are two small Townships Village which are fed by the Falls of the neighbouring
of the Village. The Falls are fed annually. No security of water is felt generally.
The Village is a small one - Still it is a fertile one - The Well lands are not full of water & time
lost of a superior quality generally - I have no materials to find out the average
Measurement or assessment of the adjacent Town lands - The statement A will show
the average income of the town during a period of 15 years from wet lands in the
Municipal or Township or Parish ^{of the} in which the Town is situated -
The average income of the Village ~~and~~ as per statement of the Municipal at the 11th.
of 1300 per annum. This is not true as usual. But as the soil does not seem blue
of a very superior quality, I frame the valuation of the Village as follows - Barreby, 1000.
No improvement raised -
Wet 6 1/2 Acres at 50 pence per acre - 328 -
Dry 1 1/2 Acres at 10 pence per acre - 172 -
Total - 3400
The Municipal average income
is arbitrarily fixed at this amount
as much as possible
O. R. D.
