Ruttivaya & Sittivaya

There are the two ^{new} Durvasanams in the peninsula of Longueue - They ^{were} ~~are~~ ^{are} entirely the possession of all to the party 13 - for subsistence - These are hereditary grants - & are in uninterrupted possession of their holders since the date of the grant - New Villages - have one Patta on paper plate - The existence of which is entered in the Board's Register of 1875 - The Patta is a registered one - These are two distinct Villages situated contiguous to each other - But the area of these Villages are given in lump on all the accounts - & the boundaries of them are given as one in the account of Rs 244 - These Villages are granted under one Patta - The Mahajannams - view them as one Village - Hence these two Villages are brought on one Register No. 14 King about the Area not about the boundaries on

The part of the Seminole Valley - These houses are compared to those in the account of 7244. Since the area of 120 Acre & 87 Cents is
on found less - The Village of Kuttuvogel consists of 16 Huts & Lottuvogel consists of four equal Villages - They are arranged as shown
in the margin - Of the Pump of 45723, 32-11-8 a part for Kuttuvogel & 19-9 for Lottuvogel. The Pump is found on the number
Villages equally - Subsequent to the Division Pump of 32-13-7 was raised to 45723 - The increase is attributable to the increase
the area of the Village - As there is no Tabular now regarding Pumps on either side, the sum of 45723 is adopted in the Settlement -
Person N 1 & 2 of 16 are descendants of the Original Grantee & others are aliens - In 1844, the Woman of 2 of 16 acquired the land
of a Pinchony from her father - Dred of 1/2 is on plain far in Creek - The 103 to 107 of 16 purchased their lands in 1827 -
11, 12, 13 were one of the Hunters in the Bayah - One Bell Graham is on plain far in Creek - The Trustee of the Temple N 11 of 16 -

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf from an old book. The paper has a slightly textured appearance with some minor discoloration and small dark spots, possibly due to age or handling. A faint, dark, curved mark is visible near the top center, and a small, dark, irregular mark is located near the top right. The left edge of the page shows a dark binding material.

Siragani Taluq

1. The trustee of the temple purchased lands from his father & made an endowment of the same to the temple. The person who claimed considerable extent of lands as *Purabale* & *Walter* a small in the *Regula* but they are unfit for cultivation.

Value

- Wet lands depend upon the ^{one} *large* & two are small. They are in repair & sown in *strong* *the*
 - They are fed by *Sanj* & *Stream* & they are *filled* annually. Dry & *Wet* lands are *cultivated* annually.
 - Fertility of *Wet* is not felt generally. $\frac{1}{3}$ of the lands are *cultivated* & *three* *annually*. *Wet* lands are *cultivated* only once. Only *Varag* is *grown* on *Wet* lands. The *Village* is *fertile* one. It is in *glorious* state. Soil is of a *superior* quality generally. I mean no *inference* to *infer* here the *average* *assessment* of the *adjacent* *Wet* lands. The *marginally* *noted* *statement* will show the *average* *assessment* of the *income* of the *Wet* lands in the *Margam* in which the *Village* is *situated*. *Wet* lands in the *adjacent* *Agar* *Village* are *varied* from 2-35 to 0-15 per *acre* with *reference* to *Wet* lands. The *average* *income* of the *Village* is 2 1/2 per *acre* or per *statement* of the *Margam*. This is not *low*. With *reference* to the *product* of *Wet* lands. I frame the *valuation* of the *Village* as follows with the *aid* of the *Margam*.

- 13 *Acres* of *Wet* *land* *cultivated* *three* *annually* at 90 per *acre* = 117
 - 25 *Acres* of *Wet* *land* *cultivated* *once* *annually* at 60 per *acre* = 150
 Total = 267-0-0
 Dry 9 1/2 *Acres* at 20 per *acre* = 191

Total = 286-0-0
