III Pongu Puper 3-9-9 is entered in the Petition account against the Village -

No other account showing the Pongu of this Village - The Pongu's Vokkeel pleads that this Pongu may be adopted in this Village as it would be carried by the panna of the Village -
wherein possessing the others - Hence the Pongu is adopted in the settlement -

Valuation

IV - - - - The Pongu's Vokkeel says that this Village is in a depopulated state - & that the wet area is not fit for cultivation as it was washed away long ago by the inundation of the adjacent Villages - & that only 8 Acre & 40 fathoms of dry land are being cultivated annually - & that boundaries may be connected into what is the land is restored - He again says that the ruined tank in this Village may be restored - within the next 10 years - I never trusted & also got the Village measured by the Taluk Gummasthar who corroborate the fact mentioned by the Vokkeel - Hence 8 Acre & 40 fathoms of dry alone are the value of the contiguous open Village is 11-11-11 - The average rate assessed of that Village is 8-3-10 per acre - The average dry assessed ranges from 2-6-0 to 1-2-0 per acre - This Village may be placed on par with that of the country near open Village - The highest dry rate is charged for Cotton which is not grown in this Village - The average income of the Village as per statement of the farmer is 8 Rupees per acre - In consideration of the state of the Village, I frame the valuation of the Village as follows - The report of the Taluk Gummasthar regarding the Village is given with this -
Dry 8 Acre & 40 fathoms cultivated at 1-8-0 per acre 12-0-0
