

Register 1202

Sin angustis Expositis

1 This is one of the Tuntum Villages in the zemindary of Peryanganal. It is not known from any of the Accounts, when, by whom & for what purpose the Village was granted. In the Account of 17211 this Village is entered as Tuntum. This is not found in any other Accounts as usual. In the Account of Tuntum forwarded to the Collector in Oct. 1860, it is said that this Village is always sold by the zemindar for his "Mann's Duty" or subsistence. This is supported by the statement of that party's Talukdar. In the Account of 17212, this Village is entered as Agem or as the property of the zemindar. In all the Pannabund Accounts, the same entry is made. And it proved from the zemindar's Account of 17212 that this Village is in possession of the zemindar since the last 62 years. I recommend to confirm the same to the present Party to one 1/8 of assessment. I would like to mention that this Village must be the property of certain person who was ejected by the zemindar in 1798, 62 years ago by reason that he was implicated in the surreptions committed by the Dewans the predecessors of the Pannabund zemindar. Several Tuntums met the similar fate.

By reason that he was implicated in the surreptitious commerce of the ~~same~~ ^{same} ~~village~~ ^{village} ~~and~~ ^{and} ~~the~~ ^{the} ~~same~~ ^{same} ~~fact.~~

II No Lot over about the area or about the boundaries on the part of the Range's Tract. The boundaries of the Village are not recorded in accounts previous to this - The recognized boundaries are copied here - & the 30 Acres & 10 parts said to be within the limits of the village are confided here - Perimeter of this Village is 3 1/2 sq as per Peterson Account. No other account to show the Perimeter of this Village -

The Range's Witness pleads that the Porcupine may be known only in the settlement as it will be known by the gunner of the Valley, & not by any other person - Hence the Porcupine is kept in the settlement -

Salutation

III. Wet lands in the Village depend upon one Tank of moderate size -
It is partly in repair - The Tank is fed by a Jungle Stream & the
The Jurnam placed 5 1/4 Annas per Acre as full water land & 13 Annas & 65 Paise of the
& 2-80 Annas of Dry as Waste - The Valuer says that this a correct account & that
the Jurnam whom he desired to measure the Village produced showing that there
is considerable decrease in the Village in the area brought on the Register & that
he cannot trust the measurement Account of the Jurnam the Account produced Jurnam
may be adopted in the settlement - This is done I think that there is some exaggeration
in the matter of Waste - The lands are left waste from the negligence of the Zamindars
servants - The ryots of the important contiguous Ryot Villages who cultivate also
the Jurnam & of the Jurnam, plough small extent of lands in the latter &
leave the remainder as waste with a view to afford fodder to their cattle -
Wet & Dry lands are good quality - Mr. Rany's Valuer says that all the
waste lands may be brought under plough within the next 5 years if the Land is
repaired thoroughly - The average income of this Village is 45 Rupees per annum as per
statement of the Jurnam & Valuer - This is not true as to full extent - Looking to the
average rate of the Village which is settled with the Ryot Village of Kharai Pargana
the rate per Acre comes to 8 Rupees per acre - The average Dry areas varies from 0.5 to 0.65
per Acre - The cost of this Village may be placed on par with that of the contiguous Village
with the Ryot & I frame the valuation of the

"Kikai" Purge - In course of the fertility of the soil -
as follows -
Web 10 in full water at 80 ft - 80 -
Web 8 in 90 ft water at 100 - 876-6 - 88248 -
Dry 2 in 280 ft water at 4 ft - 0 11 -
