Singnipatti

inter. 1206

Hebr. 1369

1160 Acres situated thereon are registered here.

III The Range & local people that the Post of August 78459 given in the Potomac Account may be adopted in the Settlement as it would have been covered by the government of the Village were in possession of strangers. In examining the previous settlement account, I found the following entries regarding the Potomac.

J. H. Pinckney

I think that the average collections of Pages 68-71 - may be adopted in the
 Posing this Village - & as I see no objection to the confirmation of the Reviewer

Valuation

IV. Wet lands in the Village depend upon one Tank - It is now repaired. It is fed by a Jungle Stream - The Tank is filled annually - Scarcely of Water is not getting for the lands that are cultivated annually. The furrows & the Tank of the Rany Classed 4 3/2 cu of Wet & 6 1/2 cu of Dry & 8 1/2 cu of garden lands are cultivated land & 11 1/2 cu of Wet & 3 1/2 cu of Dry as waste - The Waste lands are said to be about 10 years waste but to be cultivated in future - I find the best is some in the melting Wet waste - Some of the Wet lands are cultivated annually 2 times - Nayab & Nayab lands are of superior quality generally - The Village is in a state - The average income of this Village as per statement of the Tank of Laxman is 283 Rupees per annum - This is not fair thing & not unduly low - The contiguous & other Villages are Perungudi & Thiruvannamalai & Madhavapatti - The average Wet assessment of all these Villages comes to 7 1/2 Rs per acre - The average Dry assessment of the contiguous & other Villages varies from 1-2 to 50-136 per acre - The highest rate of Dry assessment is charged of which are not grown in this Village - The soil of this Village is said to be somewhat inferior to those of the adjacent & other Villages - In consideration of the soil & I frame the valuation of this Village as follows -

Wet - 48 cu cultivated at 7 Rupees	336
Wet & Dry Waste at 1 Rupee	8
