Sheet No. 1352

II. No one claimed either -
The Tell was about the area or about the above about boundaries on the part of the Range of the Red - The boundaries now inserted in the
vernacular statement correspond to those in the Account of 1746. Hence the boundaries are confirmed by the 28 Jan 1740. The statement
of the boundaries is entered in the said Jamabundy Account - annually as 21 11 8.

Therein are registered here. The Purposes of this Magazine is to inform the public of the proceedings of the Society, and to settle and the regard of the Society to the public.

Here the same is confirmed in the settled at the request of the

Valuation

III--- The Raj's Taluk states in his written proposal, which is placed with the file information
 of the Reviewing Officer, that the Tank in this Village fell in ruin half century ago, that ever since
 the Tank was not restored; that no soil cultivation was made during that period; that some of the
 lands are being cultivated annually with Raggy &c which yield to the farmer a net
 income of Rupees 20 per annum & that all the lands will be cultivated with wet crops within the
 next 10 years by restoring the Tank at a cost of 200 Rupees. The soil of the Village is of a
 medium fertility. The Village seems to be in depressed state from the defects in the administration
 of the farmer. The contractors will no doubt improve the Village by restoring the Tank &c as
 far as possible. The contiguous Ayer Village is Tirumala. The average wet amount of this
 Village is calculated for a period of 15 years previous to 1270 comes to 8 12 per acre.
 The average dry amount of the contiguous Ayer Village varies from 1 1/4 to 5 13 per acre.
 It is to be remembered that this Village is open to vast improvement & that it will be improved shortly
 & that, in consideration of all these circumstances, the valuation is given below

17 1/2 say 18 now cultivated part, in the dry grain & past, & 10 water } 61 1/4
 at 3 1/2 Rupees per acre
