

Village.

majoring 1/9.

$$m - 3 = \frac{1}{2}$$

Total 1

This is one of the Shamshad and in the Zimindari of Sivapanga. This was granted by one of the ancestors of the present Zimindar, to the person in 13 and others for subsistence. This is hereditary right. This is in uninterrupted possession.

of field holders since the date of the grant. This has no value. It was lost. The village is supported by all the accounts in Col. 12. No tax was about the area nor about the boundaries on the part of the remainder's Vatal. The boundaries correspond to those in the account of D. 1223 and of D. 1246. There is slight difference in the wording of these boundaries. But they are said to be an and the same on the spot. Hence the area of 24 acres and 9 cents situated within the said boundaries is confirmed here. The entire village is enjoyed as there in the margin. The persons Nos. 1 & 2 in Col. 16 pay half of the pargana to the person No. 3 the remainder. The lands are undivided. The persons in Col. 16 say that they are descendants of the original grantee. But they never entered the name of the original grantee in the statement. They entered one Kuppaiyaru as grandfather of grandfather of the person No. 3 in Col. 16 and pleaded that the person in Col. 13 is also called by the name of Kuppaiyaru. This is not worthy of reliance. However, the persons in Col. 16 are related to the person in Col. 15. This it proved that this village is in possession of the family of the persons in Col. 16 since the last half century.

II. Wet lands depend upon two tanks of small size. They are in repair. They are fed by jungle stream. The tank is filled annually. Scarcity of water is not felt generally. The Mahajanams say that the wet and dry lands classed as waste are of long uncultivated

REMARKS OF THE PERSON INTERVIEWED AND OF THE INTERVIEWER (Signature - Initials or monogram)					
If the facts have been established, the interview, etc., has been directed to proceed in these directions.					
Established in the interview, the interview, etc., has been directed to proceed in these directions.	Was not established in the interview, etc., has been directed to proceed in these directions. 10 Lands and that they are fit to be Cultivated within 2 or 3 years.
 Some of the wet lands are Cultivated annually. Dry and wet soil
 is of a medium character generally. The average income of the village
 as per statement of the Habajans is 32-8-0 per annum. This is not true.
 There are no agan villages contiguous to the village under settlement.
 The agan village of Palangpam is situated at a distance of half mile. This
 is the nearest village. The average net statement of the agan village is
 4-6-0 per acre. The Habajans say that their land may be classed
 on par with those of the agan village. Panga rates vary from 1-11-0 to 2-6-0
 per acre in the agan village. The highest rate is charged for cotton which
 is not grown in this village. In consideration of the fertility of soil
 etc. I frame the valuation of the village as follows.

wet 6 acres Cultivated at 4 1/2 Rupees per acre	-	69-00	
wet 2 acres Waste at 1 Rupee per acre	-	~~2-12~~	51-00
Dry 5 1/2 acres Cultivated at 4 1/2 per acre	-	4-13	
Dry 2 1/2 acres waste at 4 as per acre	-	0-10	57-00
		Total	56-70
